PC#287

Dear Members of the IL Pollution Control Bd:

I urge you to accept the Governor's proposal of strong controls that would cut coal plant mercury pollution by 90% by 2009. Every waterway in IL now carries a health warning for mercury contamination. IL can show America how cost-effective measures for mercury control will clean up local lakes and streams to promote a healthy economy. Reducing mercury emissions by 90% is achievable at a reasonable cost. Please approve this plan to protect our families and our wildlife.

Thank you,

Linda Krutman
