**Re: Request for Provisional Variance – Gasoline Volatility Standards**

On July 25, 2006, the Illinois EPA received from Illinois Petroleum Marketers Association (“IPMA”) on behalf of all emission sources subject to 35 Ill. Adm. Code Part 219, Subpart Y, a request for provisional variance to allow the sale or offer for sale, dispensing, supply or offer for supply or transport of gasoline and/or ethanol blend gasoline in St. Clair, Madison, and Monroe counties, located in Illinois, exceeding the applicable limitations for Reid vapor pressure. The Illinois EPA accepted this request for review pursuant to the requirements of the Illinois Environmental Protection Act (“Act”) and the applicable Agency regulations.

The Illinois EPA evaluated the request pursuant to the requirements of Sections 35, 36, and 37 of the Act and the Agency regulations at 35 Ill. Adm. Code Part 180. The Illinois EPA is granting the request for provisional variance as it has been demonstrated that an arbitrary and unreasonable hardship will result in the event of a denial.

IPMA seeks provisional variance from 35 Ill. Adm. Code Part 219 Subpart Y (Gasoline Distribution) volatility standards. The Illinois EPA is granting relief to petroleum marketers located in St. Clair, Madison, and Monroe counties from the applicable requirements of 35 Ill. Adm. Code Sections 219.585(b) and (c). Relief is granted through August 4, 2006.

The Illinois EPA is granting the requested relief to all emissions sources subject to 35 Ill. Adm. Code Part 219, Subpart Y, located in St. Clair, Madison, and Monroe counties subject to the following conditions:

1. By September 15, 2006, petroleum marketers shall provide the Illinois EPA a written report of the estimated total tons of VOM emitted during gasoline and gasoline blend distribution operations conducted during the term of the provisional variance with supporting calculations.
2. Each distributor shall document the Reid vapor pressure of all gasoline or ethanol blend gasoline leaving the distribution operation for use in Illinois. Any operation receiving this gasoline or ethanol blend gasoline shall be provided with a copy of an invoice, bill of lading, or other documentation used in normal business practice stating the Reid vapor pressure of the gasoline or ethanol blend gasoline.

A facility accepting this provisional variance must, within 7 days from the date of this document, submit to the Illinois EPA a certification signed by the facility's owner or operator accepting regulatory relief granted by this provisional variance as follows:

**Certification**

I(We), \_\_\_\_\_, have read the Illinois EPA's provisional variance, dated July 25, 2006, and I(we) are a facility subject to the requirements of 35 Ill. Adm. Code Part 219, Subpart Y. I(We) hereby accept and agree to be bound by all terms and conditions of the provisional variance.

The certification shall be hand delivered or mailed by certified mail to:

Julie K. Armitage, Acting Manager  
Compliance and Enforcement Section  
Illinois Environmental Protection Agency
