Letter From the Chairman

The Illinois Pollution Control Board was very busy during the month of September. The Board held regulatory hearings on the Tiered Approach to Corrective Action Objectives (TACO) and the Illinois Environmental Protection Agency's (Agency) Clean Air Act proposals to control the nitrogen oxides (NOx) emissions from electrical generating units. Additionally, the Board was busy conducting hearings on the potential environmental impact of proposed peaker plants.

With regard to the peaker plant issue, the Board held public hearings in Naperville, Joliet, and Grayslake to gather input from local government representatives, citizens' groups, and individuals. In August, the Board heard from the Agency and industry representatives in Chicago. The hearings will conclude in October and the Board will accept public comment until November 6, 2000. The Board plans to issue an informational order in the peaker plant matter by the end of the year.

The Board also continued the hearing process for NOx during September. It held several hearings focusing on NOx emissions standards for electrical generating units, and began hearings on NOx emissions standards for cement kilns. The Agency has requested the changes in order to comply with federal law. The changes will require various industries to substantially reduce NOx emissions over the next several years.

The TACO hearing process was completed in September. Businesses use the TACO rules when cleaning up property that has been contaminated in order to determine how clean the site must be for specific uses.

In addition to NOx, TACO, and peaker plants, the Board continues to conduct its normal business of hearing contested cases and other rulemakings. If you have any questions or comments, please contact our Public Information Coordinator, Connie Newman at 217/782-7630, or by email: newmanc@ipcb.state.il.us.

Sincerely,

A handwritten signature in cursive script that reads "Claire A. Manning". The signature is written in dark ink on a light background.

Federal Update

United States Environmental Protection Agency Proposes National Emission Standards for Hazardous Air Pollutants, Paper and Other Web Coating

On September 13, 2000, USEPA proposed national emission standards for hazardous air pollutant (NESHAP) emissions from facilities that coat paper and other web substrates. 65 Fed. Reg. 55332 (September 13, 2000). USEPA has identified these facilities as a major source of hazardous air pollutants (HAP). The proposed standards implement Section 112(d) of the Clean Air Act (42 U.S.C. §§ 7401 *et seq.* (1998)) by requiring all major sources to meet HAP emission standards reflecting the maximum achievable control technology. USEPA estimates that the proposed NESHAP would eliminate approximately 80 percent of nationwide HAP emissions from major sources.

Comments must be received by November 13, 2000. For further information contact Paul Almodovar at 919/541-0283; e-mail address: almodovar.paul@epa.gov.

Pursuant to Section 9.1(b) of the Environmental Protection Act (Act) (415 ILCS 5/9.1(b) (1998)), once adopted by USEPA, NESHAP rules are applicable and enforceable under the Act without further action by the Board.

United States Environmental Protection Agency Proposes Clarification to Unregulated Contaminant Monitoring Regulations under the Safe Drinking Water Act

On September 13, 2000, USEPA proposed analytical methods in List 2, and to require monitoring for those contaminants in drinking water. 65 Fed. Reg. 55361 (September 13, 2000).

The Safe Drinking Water Act (42 U.S.C. §§ 300(f) *et seq.* (1998)), requires USEPA to establish criteria for a program to monitor unregulated contaminants and to publish a list of the contaminants to be monitored. USEPA published the Revisions to the Unregulated Contaminant Monitoring Regulation (UCMR) for public water systems on September 17, 1999 (64 Fed. Reg. 50556), which included lists of contaminants for which monitoring was required or would be required in the future. These lists included: List 1 for contaminants with analytical methods; List 2 for contaminants with methods that were being refined; and List 3 for contaminants with methods that were still being developed.

The action proposes analytical methods for fourteen contaminants on List 2, and to require monitoring for those contaminants in drinking water. These methods and associated monitoring are proposed to support USEPA decisions concerning whether or not to regulate and establish standards for these contaminants in drinking water. The intent of regulating and setting standards for any of these contaminants that may be found to occur at levels of health concern is to protect public health. Additionally in this rule, USEPA proposed modifications to the UCMR that affect the implementation of monitoring for both List 1 and List 2 contaminants.

Comments must be received by October 13, 2000. For further general information contact USEPA Safe Drinking Water Hotline at 800/426-4791. For technical information regarding everything but the analytical methods, contact Charles Job at 212/260-7084. For technical information regarding the analytical methods, contact David Munch at 513/569-7948; e-mail address: Munch.Dave@epa.gov.

The unregulated contaminant-monitoring program is implemented by USEPA.

United States Environmental Protection Agency Proposes Identification and Listing of Hazardous Waste; Inorganic Chemical Manufacturing Wastes under the Hazardous Waste Management System; Land Disposal Restrictions for Newly Identified Wastes; and CERCLA Hazardous Substance Designation and Reportable Quantities

On September 14, 2000, USEPA proposed to amend the regulations for hazardous waste management under the Resource Conservation and Recovery Act (RCRA) (42 U.S.C. §§ 6901 *et seq.* (1998)) by listing as hazardous three wastes generated from inorganic chemical manufacturing processes. 65 Fed. Reg. 55683 (September 14, 2000).

USEPA also proposed to not list as hazardous various other process wastes. The action proposed to add the toxic constituents found in the wastes to the list of constituents that serves as the basis for classifying wastes as hazardous, and to establish treatment standards for the wastes. USEPA predicts that the effect of this proposed regulation would be to subject the wastes to stringent management and treatment standards under Subtitle C of RCRA.

Additionally, the action proposed to designate the wastes proposed for listing as hazardous substances subject to the

Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. §§ 9601 *et seq.* (1998)) and to adjust the one pound statutory reportable quantities for some of these substances.

USEPA will accept public comments on the proposed rule until November 13, 2000. For further general information contact Gwen DiPietro at 703/308-8285; e-mail address: dipietro.gwen@epa.gov. For further technical information contact Lynn Beasley at 703/603-9086; e-mail address: beasley.lynn@epa.gov.

If adopted by USEPA, the Board will incorporate any necessary amendments in a future identical-in-substance rulemaking.

United States Environmental Protection Agency Proposes Stay to National Emission Standards for Hazardous Air Pollutants; Secondary Aluminum Production

On September 14, 2000, USEPA proposed a stay of the national emission standards for hazardous air pollutant (NESHAP) emissions for secondary aluminum production. 65 Fed. Reg. 55491 (September 14, 2000).

USEPA proposed a rule to stay the applicability of the NESHAP for secondary aluminum production, as applied to aluminum foundries and aluminum die casting facilities, during the pendency of a separate rulemaking to adopt alternate maximum available control technology (MACT) requirements for these sources. USEPA intends to take final action concerning this proposed stay at the same time as it proposes to remove aluminum foundries and aluminum die casting facilities from the present secondary aluminum standard and to adopt alternate MACT requirements deemed necessary and appropriate for these sources.

Comments must be received by October 16, 2000. For further information contact Juan Santiago at 919/541-0184; e-mail address: Santiago.Juan@epa.gov.

Pursuant to Section 9.1(b) of the Environmental Protection Act (Act) (415 ILCS 5/9.1(b) (1998)), once adopted by USEPA, NESHAP rules are applicable and enforceable under the Act without further action by the Board.

United States Environmental Protection Agency Proposes Adding Onboard Diagnostic Check to the Clean Air Act Vehicle Inspection/Maintenance Program

On September 20, 2000, USEPA proposed revisions to the Motor Vehicle Inspection/Maintenance (I/M) requirements to provide additional flexibility to state I/M programs by allowing such programs to replace traditional I/M tests on model year 1996 and newer vehicles so-equipped with a check of the onboard diagnostic (OBD) system. 65 Fed. Reg. 56844 (September 20, 2000).

Additionally, the proposed amendments would: extend the deadline for beginning OBD inspections from January 1, 2001 to January 1, 2002; revise and simplify the failure criteria for the OBD check; address State Implementation Plan credit modeling for the OBD check; allow for limited exemptions from some OBD check failure and/or rejection criteria for certain model year vehicles; and correct a typographical error in the current basic I/M performance standard regarding OBD-I/M vehicle coverage.

The proposal solicits public comment on how to address the issue of repair waivers for OBD-equipped vehicles and the possibility of extending the deadline for implementing OBD-I/M checks even further. Comments must be received by October 20, 2000. For further information contact David Sosnowski at 734/214-4823.

The Board opens regulatory dockets to amend its I/M rules upon receipt of Agency proposals under Section 13B-20(a) of the Vehicle Emissions Law (625 ILCS 5/13B-20(a) (1998)). Some of the proposed amendments may be handled in pending docket R01-12, In the Matter of: Enhanced Vehicle Inspection and Maintenance (I/M) Regulations: Amendments to 35 Ill. Adm. Code Part 240.

Rule Update

Board Adopts Proposal for Public Comment in In the Matter of: UIC Update, USEPA Amendments (January 1, 2000 through June 30, 2000), R00-11 and R01-1 (consolidated)

On September 7, 2000, the Board proposed for public comment amendments to the Illinois regulations that are identical in substance to the underground injection control (UIC) regulations that USEPA adopted to implement Section 1421 of the federal Safe Drinking Water Act (SDWA) (42 U.S.C. § 300h (1998)). Sections 7.2 and 13(c) of the Environmental Protection Act (Act) (415 ILCS 5/7.2 and 13(c) (1998)) provide for quick adoption of regulations that are identical in substance to federal regulations that USEPA adopts to implement Section 1421 of SDWA. Section 13(c) of the Act also provides that Title VII of the Act and Section 5 of the Administrative Procedure Act (5 ILCS 100/5-35 and 5-40 (1998)) do not apply to the Board's adoption of identical-in-substance regulations. The federal UIC regulations are found at 40 C.F.R. 144 through 148.

The Board determined that it was necessary to consolidate two separate dockets in this rulemaking and expedite consideration of certain later amendments. The proposal was published in the *Illinois Register* on October 6, 2000 (24 Ill. Reg. 14528), commencing the 45-day public comment period. The public comment period expires on November 20, 2000.

Please direct any questions regarding this rulemaking to Michael McCambridge at 312/814-6924; e-mail address: mccambm@ipcb.state.il.us.

Board Adopts Amendments in In the Matter of: Conforming and Technical Amendments to 35 Ill. Adm. Code 809, R00-18

On September 7, 2000, the Board adopted amendments to 35 Ill. Adm. Code 809. The adopted amendments were published in the *Illinois Register* on October 6, 2000 (24 Ill. Reg. 14747).

The genesis of this docket, R00-18, was in predecessor docket R99-18, In the Matter of: Amendments to Permitting for Used Oil Management and Used Oil Transport: 35 Ill. Adm. Code 807 and 809 (December 16, 1999). Although the Board dismissed the Agency's used oil facility/transporter permitting proposal on December 16, 1999, the Board determined that certain technical changes to Part 809 of the Board's rules that were a part of the R99-18 docket should be addressed in another rulemaking. The Board also determined that one substantive change to Part 809 was also necessary.

On March 16, 2000, the Board adopted these proposed rules for first-notice publication in the *Illinois Register* and identified the docket as R00-18. Subsequently, the proposed amendments to Part 809 of the Board's rules were published in the *Illinois Register* on April 7, 2000 (24 Ill. Reg. 5854). The Board held two hearings in this matter.

No public comments were received during the first or second-notice periods with the exception of several minor editorial changes suggested by the Joint Committee on Administrative Rules (JCAR). On July 13, 2000, the Board proposed the rules for second notice review by JCAR. After consideration of the rules at its August 15, 2000 meeting, JCAR issued a certificate of no objection.

The substantive change in this rulemaking involves the permitting and manifesting of hazardous waste. The change only affects owners and operators of the same or geographically contiguous properties who must use public rights of way to transport hazardous waste from one part of a facility to another. The Board also made technical amendments to 35 Ill. Adm. Code 809. The changes suggested by JCAR during both this and a prior rulemaking were non-substantive.

Board Adopts First Notice Proposal in In the Matter of: Amendments to Diesel Opacity Rules Required by P.A. 91-254 and P.A. 91-865, Proposed Amendments to 35 Ill. Adm. Code 240, R01-8

On September 7, 2000, the Board proposed amendments to 35 Ill. Adm. Code 240 for first notice publication in the Illinois Register, pursuant to the Illinois Administrative Procedure Act (5 ILCS 100/1-1 et seq. (1998)). The Illinois General Assembly adopted legislation in 1999 that amends the diesel smoke opacity tests and procedures under the Illinois Vehicle Code (625 ILCS 5/1-101 et seq. (1998)) (see Pub. Act 91-254, eff. July 1, 2000). The law requires the Board to amend its existing diesel smoke opacity rules of 35 Ill. Adm. Code 240 within eight months of the legislation's effective date of July 1, 2000. To meet this deadline, the Board plans to enter its final opinion and order concerning such amendments on or before February 28, 2001.

The Board held the first hearing in this matter on October 4, 2000, at 11:00 a.m. in Springfield. The second hearing will be held on October 24, 2000, at 10:00 a.m. in Chicago. The hearing officer order providing notice of hearing is available on the Board's Web site at: <http://www.ipcb.state.il.us/rules/proposal>. The proposed amendments were published in the *Illinois Register* on September 22, 2000 (24 Ill. Reg. 14146). The 45-day public comment period will end on November 6, 2000.

The Board Accepts Proposal for Hearing in In the Matter of: Revisions to Antidegradation Rules: 35 Ill. Adm. Code 302.105, 303.205, 303.206, and 106.990-106.995, R01-13

On September 7, 2000, the Board accepted a proposal from the Illinois Environmental Protection Agency (Agency) for hearing and directed the hearing officer to schedule hearings as required by Title VII of the Environmental Protection Act (Act) (415 ILCS 5/1 et seq. (1998)). On August 30, 2000, the Agency filed a rulemaking proposal pursuant to Section 27 of the Act (415 ILCS 5/27 (1998)) to amend the Board's existing nondegradation rule at 35 Ill. Adm. Code 302.105. The Agency's proposed amendments would change the program name to "antidegradation" consistent with federal regulatory changes. New rules are proposed regarding outstanding resource waters (35 Ill. Adm. Code 303.205-206) as well as new procedural rules for outstanding resource water determinations (35 Ill. Adm. Code 101.Subpart L).

Hearings on this proposal will be scheduled in the near future. For additional information contact: Marie Tipsord at 312/814-4925; e-mail address: tipsorm@ipcb.state.il.us.

The Board Accepts Proposal for Hearing in In the Matter of: Proposed MTBE Groundwater Quality Standards Amendments: 35 Ill. Adm. Code 620, R01-14

On September 7, 2000, the Board accepted a proposal for hearing from the Illinois Environmental Protection Agency (Agency) and directed the hearing officer to schedule hearings as required by Title VII of the Environmental Protection Act (Act) (415 ILCS 5/1 et seq. (1998)). On September 1, 2000, the Agency filed a rulemaking proposal pursuant to Section 8 of the Groundwater Protection Act (415 ILCS 55/8 (1998)) and Section 27 of the Act (415 ILCS 5/27) (1998)) to establish groundwater quality standards for the contaminant methyl tertiary-butyl ether (MTBE). The proposal would set preventive response level standards of 0.020 mg/l and groundwater quality standards of 0.070 mg/l for Class I and Class II groundwater. The proposal would also amend 35 Ill. Adm. Code 620.505 "compliance determinations" to include specification of conditions when drinking water supply wells can be used for such determinations, in addition to various other changes. The Agency requests that the Board adopt these proposed rules "as expeditiously as practicable."

Hearings on this proposal will be scheduled in the near future. For additional information contact: Amy Jackson at 217/524-8507; e-mail: jacksoa@ipcb.state.il.us.

Board Adopts Proposal for Public Comment in In the Matter of: RCRA Subtitle C Hazardous Waste Update, USEPA Amendments (January 1, 2000 through June 30, 2000), R01-3

On September 21, 2000, the Board proposed for public comment amendments to the Illinois regulations that are "identical in substance" to hazardous waste regulations that USEPA adopted to implement Subtitle C of the federal Resource Conservation and Recovery Act of 1976 (RCRA Subtitle C) (42 U.S.C. §§ 6921 *et seq.* (1998)). The amendments include amendments that USEPA adopted during the period from January 1, 2000 through June 30, 2000. USEPA amended the federal RCRA Subtitle C regulations on five occasions during the relevant time period.

Sections 7.2 and 22.4(a) of the Environmental Protection Act (Act) (415 ILCS 5/7.2 and 22.4(a) (1998)) provide for quick adoption of regulations that are identical in substance to federal regulations that USEPA adopts to implement Sections 3001 through 3005 of RCRA (42 U.S.C. §§ 6921-25 (1998)). Section 22.4(a) also provides that Title VII of the Act and Section 5 of the Administrative Procedure Act (5 ILCS 100/5-35 and 5-40 (1998)) do not apply to the Board's adoption of identical in substance regulations. Therefore, the amendments are not subject to first or second-notice review by the Joint Committee on Administrative Rules.

The proposal for public comment will be published on October 13, 2000 (24 Ill. Reg. 14945). The Board will accept written public comment for at least 45 days after the date of *Illinois Register* publication, *i.e.*, through November 27, 2000.

IEPA Restricted Status List

Illinois Environmental Protection Agency
Division of Public Water Supplies
Restricted Status List -- Public Water Supplies

The Restricted Status List was developed to give additional notification to officials of public water supplies which are in violation of 35 Ill. Adm. Code, Subtitle F: Public Water Supplies, Chapter I or the Illinois Environmental Protection Act (Act) (415 ILCS 5/1 *et seq.* (1998)).

The Restricted Status List will include all Public Water Supplies for which the Agency has information indicating a violation of any of the following requirements: Finished water quality requirements of 35 Ill. Adm. Code, Part 604, Subparts B and C; maintenance of adequate pressure on all parts of the distribution system under all conditions of demand; meeting raw water quantity requirements of 35 Ill. Adm. Code 604.502; or maintenance of treatment facilities capable of providing water "assuredly adequate in quantity" as required by Section 18 of the Act.

A public water supply on the Restricted Status List will not be issued permits for water main extensions, except for certain limited situations, or unless the supply has been granted a variance from the Illinois Pollution Control Board for the violation, or from permit issuance requirements of Section 39 of the Act.

This list is continually being revised as new information becomes available, and therefore, specific inquiries as to the status of any public water supply should be directed to the Division of Public Water Supplies for final determination. This list reflects the status as of October 1, 2000.

* Indicates public water supplies which have been added to the list since the previous publication.

IEPA Critical Review List

Illinois Environmental Protection Agency
Division of Public Water Supplies
Critical Review List -- Public Water Supplies

The Critical Review List was developed to give additional notification to officials of public water supplies which may be close to being in violation of 35 Ill. Adm. Code, Subtitle F: Public Water Supplies, Chapter I or the Illinois Environmental Protection Act.

A supply will be placed on the Critical Review List when Agency records indicate that it is approaching any of the violations that would place it on the Restricted Status List.

This list is continually being revised as new information becomes available, and therefore, specific inquiries as to the status of any public water supply should be directed to the Division of Public Water Supplies for final determination. This list reflects the status as of October 1, 2000.

* Indicates public water supplies which have been added to the list since the previous publication.

Listing of Adjusted Standards

LISTINGS OF ADJUSTED STANDARDS AND COMBINED SEWER OVERFLOW EXCEPTIONS GRANTED BY THE BOARD DURING FISCAL YEAR 2000

Section 28.1(d)(3) of the Environmental Protection Act (Act) (415 ILCS 5/28.1(d)(3) (1998)) requires the Board to annually publish in the *Illinois Register* and *Environmental Register* at the end of each fiscal year a listing of all determinations made pursuant to Section 28.1. This notice sets forth all adjusted standards and combined sewer overflow exceptions determinations made by the Board during fiscal year 2000 (July 1, 1999 through June 30, 2000).

Final Actions Taken by the Pollution Control Board in Adjusted Standards Proceedings During Fiscal Year 2000 (July 1, 1999, through June 30, 2000)

<u>Docket/Docket Title</u>	<u>Final Determination</u>
<u><i>In re</i> Petition of Horsehead Resource Development Company, Inc.</u> (August 5, 1999), AS 00-01	The Board dismissed the petition filed on behalf of this Chicago, Cook County facility for an adjusted standard from the definition of "solid waste" or "hazardous waste" under the RCRA Subtitle C regulations because the petitioner had failed to timely publish the notice required by Section 28.1(d)(1) of the Act.
<u><i>In re</i> Petition of Horsehead Resource Development Company, Inc.</u> (February 17, 2000), AS 00-02	The Board determined with respect to this Chicago, Cook County facility that the crude zinc oxide product generated by the facility should be classified as a commodity-like material and is not a solid waste subject to regulation under the RCRA Subtitle C hazardous waste rules.
<u><i>In re</i> Petition of the Ensign-Bickford</u> (September 23, 1999), AS 00-03	The Board dismissed this petition filed on behalf of a Wolf Lake, Union County facility for an adjusted standard from the Board's open burning restrictions because the petitioner had failed to timely publish the notice required by Section 28.1(d)(1) of the Act.
<u><i>In re</i> Petition of Takasago Corporation (U.S.A.)</u> (April 20, 2000), AS 00-04	The Board dismissed this petition filed on behalf of a University Park, Will County facility for an adjusted standard from certain of the wastewater discharge levels for total dissolved solids because the petitioner had failed to timely publish the notice required by Section 28.1(d)(1) of the Act.
<u><i>In re</i> Petition of Ford Motor Company (Chicago Assembly Plant)</u> (April 6, 2000), AS 00-06	The Board granted this Chicago, Cook County facility an adjusted standard from certain volatile organic material emissions limitation requirements. The adjusted standard will enable Ford to implement an alternative emissions control plan for solvent clean-up operations.

In re Petition of Central Illinois Public Service Company (February 3, 2000), AS 00-07

The Board allowed the voluntary withdrawal OF Central Illinois Public Service Company's petition for an adjusted standard from the Board's general use water quality standards regulations for its Jackson County facility.

In re Petition of Vonco Products, Inc. (February 17, 2000), AS 00-08

The Board allowed the voluntary withdrawal of Vonco Products, Inc.'s petition for an adjusted standard from certain of the Board's flexographic and rotogravure printing regulations for its Lake Villa, Lake County facility.

In re Petition of Bema Film Systems, Inc. (February 17, 2000), AS 00-09

The Board allowed the voluntary withdrawal of Bema Film Systems, Inc.'s petition for an adjusted standard from certain of the Board's flexographic and rotogravure printing regulations for its Elmhurst, DuPage County facility.

In re Petition of Formel Industries, Inc. (February 17, 2000), AS 00-10

The Board allowed the voluntary withdrawal of Formel Industries, Inc.'s petition for an adjusted standard from certain of the Board's flexographic and rotogravure printing regulations for its Franklin Park, Lake County facility.

In re Petition of Heritage Environmental Services, Inc. (June 8, 2000) AS 00-14

The Board dismissed this petition filed on behalf of Heritage Environmental Services, Inc. for an adjusted standard for its Cook County site from certain of the Board's RCRA and UIC permit program regulations because the petitioner had failed to timely publish the notice required by Section 28.1(d)(1) of the Act.

Final Actions Taken by the Pollution Control Board in Combine Sewer Overflow Exception Proceedings During Fiscal Year 2000 (July 1, 1999 through June 30, 2000)

The Board took no action on combined sewer overflow exception proceedings during fiscal year 2000.
