Jul 18, 2012

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,

Ms. Danielle Piraino

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO2) and nitrous oxide (NOx), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO2 and NOx pollution in return for more time to make its mercury pollution reductions.

I am one of many who suffer from lung disease (never smoked once and have always kept in good shape by the way) which has been very costly and dangerous. Ameren has already done much damage to our Life Support System over the years- it's time they clean up.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Thank you for your immediate attention to this matter-
Leslie Krebs

Jul 23, 2012

Illinois Pollution Control Board Members

Dear Control Board Members,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

Coal-fired power plants, such as the ones owned by Ameren, are the largest source of mercury pollution in the country and in Illinois. Mercury is toxic to all life forms and is not used for any biological function of any organism on the planet.

Ameren may be saving money by delaying pollution control equipment, but they are pushing this cost onto the livelihoods of those who live and visit the watersheds where these pollutants accumulate into the food chain. In economics terms, these externalities of learning disabilities, health effects, and loss of fishing and tourism revenue, need to be paid for by the source.

Please do not have Ameren continue to externalize these ecological and health costs onto others and have them fulfill their promise and responsibility.

Sincerely,

Mr. Jeremy Slate

Dear Mr. John Therriault:

Illinois Pollution Control Board Members

Dear Board Members,

I object to Ameren Corporation's Petition for a Variance, Docket No. PCB 2012-126.

As an Illinois resident concerned with lung health, I strongly urge the board to REJECT Ameren's request to delay compliance with state rules that require significant cuts in dangerous sulfur dioxide emissions rates from the company's fleet of coal power plants operating in Illinois. Sulfur dioxide is a dangerous air pollutant that contributes to asthma attacks, respiratory hospitalizations, and premature deaths.

Compared to a future where Ameren complies with existing state pollution rules, granting the delay requested by the company would lead to hundreds of additional asthma attacks and scores more premature deaths. Ameren was given ample time to comply with state power plant pollution regulations, which were put in place over five years ago. Please deny the variance requested by Ameren. Illinoisans' health and lives should not be put at risk any longer!

Sincerely,
Lewis Smith

Dear Board Members,

I object to Ameren Corporation's Petition for a Variance, Docket No. PCB 2012-126.

As an Illinois resident concerned with lung health, I strongly urge the board to REJECT Ameren's request to delay compliance with state rules that require significant cuts in dangerous sulfur dioxide emissions rates from the company's fleet of coal power plants operating in Illinois. Sulfur dioxide is a dangerous air pollutant that contributes to asthma attacks, respiratory hospitalizations, and premature deaths.

Compared to a future where Ameren complies with existing state pollution rules, granting the delay requested by the company would lead to hundreds of additional asthma attacks and scores more premature deaths. Ameren was given ample time to comply with state power plant pollution regulations, which were put in place over five years ago. Please deny the variance requested by Ameren. Illinoisans' health and lives should not be put at risk any longer!

Sincerely,
Julie Vanderbilt
