Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

PLEASE STOP POLLUTING BEFORE IT'S TOO LATE. I STRONGLY OPPOSE YOUR VARIANCE PETITION AND SUPPORT ONLY THOSE COMPANIES THAT SUPPORT CLEAN ENERGY FOR TODAY AND FOR ALL FUTURE GENERATIONS.

Sincerely,
Ms. Sharon Richmond

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

Big corporations are at it again. Good grief.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. A deal is a deal.

The state upheld its side, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

If Ameren doesn't do what it promised to do, fine the heck out of them. We need the money and we don't need their pollution.

It's ridiculous that we are threatened constantly by these major companies. They pad their bottom line, overpay their executives and leave the rest of us hanging.

Do what needs to be done. Hold firm and fine them for every minute they don't clean up their act.

Sincerely,
Mrs. L Moss

P.S. It is bad enough the second hand smoke we receive and return exhaust from all sorts of gasoline or diesel fueled machines...but now we have to endure this..and especially when it has been promised to us that it would not happen. If they proceed with these actions it will not surprise me humans are made to lie, cheat and steal so whats new?

Sincerely,
Mr. austin fitts

I live in Peoria, downwind of the A.G. Edwards Ameren plant. No one is talking about what will happen to our local area if this delay causes Peoria metro region to be out of compliance for Attainment on federal air regulations.

I think Ameren has had enough delays and excuses and should have to clean up their plants as they agreed.

Sincerely,
Ms. Joyce Blumenshine

The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Ameren SEC reports indicate that they have cancelled the pollution control updates for the Edwards- Bartonville plant. I do not want Ameren to continue to pollute in the Peoria area and expose me and others to the greater risk of respiratory and heart disease. If Ameren now has a dysfunctional business model-- consumers should not have to pay for their bad business decisions.

Sincerely,
Ms. Joyce Harant

The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Johnathan Ebbers

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

We don't need any more delays on this action. This request for a variance to the previous agreement is completely specious and egregious. Its time for this energy company to pay the piper and pony up. Everyone's health and welfare is involved not just their bottom line. Please deny this petition and start the ball rolling toward a cleaner more breathable world.

Sincerely,
Mr. James Jaeger

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Ms. Shaylene Ader-Steinhauser

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mrs. Lindsey Hammond

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Ms. Stephanie Miklavcic

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Mr. Abu Bakr Nurrudin

The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Miss Morgan Towsley

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Sincerely,
Ms. Gail Schoenbacher

Subject: Please Reject Ameren's Petition for a Variance (Docket No. PCB 2012-126)

Dear Illinois Pollution Control Board,

I object to Ameren's Petition for a Variance, Docket No. PCB 2012-126.

In 2006, Illinois made history by passing a leading mercury pollution reduction standard. The original agreement included new clean air standards for mercury, sulfur dioxide (SO₂) and nitrous oxide (NO_x), which create acid rain and smog, as well as many health-related problems. Ameren committed to a schedule for reducing its SO₂ and NO_x pollution in return for more time to make its mercury pollution reductions.

The state upheld its side of the deal, but now Ameren is trying to stall cleaning up its coal plants like it promised to. Please reject the company's request for a variance and hold the company to the standard passed in 2006. The agreement to reduce mercury pollution is vital in protecting public health and the environment through Illinois and the Midwest. This is critical for my health, our environment and the Midwest's future.

Please DO NOT allow Ameren any waivers to the 2006 standard. The residents of Illinois - young, old, current and future - deserve to breathe clean air.

Sincerely,
Ms. Karen Mueser
