RE: PCB 2013-024

Mr. Therriault

Midwest Generation's dirty coal plants in Illinois have been dumping dangerous sulfur dioxide emissions into the air and making local residents sick for far too long. In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance.

Sincerely,

Georgiann Schulte

In order to reduce dangerous pollution and save lives in Illinois, I urge you to require the company to meet the pollution reductions it previously agreed to by voting no on the requested variance I have asthma and so do many of my students. I am a parent and do not want my child bombarded with toxins. It is one of my biggest concerns and certainly drives my voting agenda. It is bad enough that the Metra uses coal fuel and drives through my Hyde Park neighborhood. I know that coal is behind the reason why Illinois has the highest asthma rate in the country and these companies must be made to comply with safety standards. If they can't afford them, then they cannot afford to be in business.
