Let's focus on one of the power plants Dynegy wants to purchase from Ameren, E.D. Edwards. We must remind you that Ameren had a terrible environmental record when they operated the E.D. Edwards power plant. As stated in the recent lawsuit filed by Sierra Club and NRDC, this facility has, by its own admission, violated EPA Opacity standards 1000 times in the last 5 years. Illinois was wrong to grant Ameren the variance extension to 2020 in the first place. We now have a chance to correct this mistake by denying Ameren the right to pass on this pollution variance to Dynegy if it buys Ameren's power plants. Remember that Dynegy has a poor record on pollution in the past. They also have a weak financial position. There is no way Dynegy will pay for all the environmental upgrades to make E.D. Edwards into a clean and profitable coal fired power plant.

Thank you for allowing my wife and I to give you my input.

Sincerely,

Robert Jorgensen & Martha Jorgensen]
