The **Illinois Pollution Control Board** is an independent five-member board that adopts environmental control standards and also rules on enforcement actions and other environmental disputes for the State of Illinois.

The *Environmental Register* is published monthly by the Board and contains updates on rulemakings, descriptions of final decisions, the Board's meeting and hearing calendar, and other environmental law information.

All editions of the *Environmental Register* dating back to 1990 are available at <http://www.ipcb.state.il.us/ecll/environmentalregister.asp> .

RULEMAKING UPDATE

Board Adopts Amendments to Public Water Supply Rules, R15-22

On April 7, 2016, the Board adopted final amendments to its public water supply rules at 35 Ill. Adm. Code 601, 602, and 603. The amendments (1) update Parts 601 through 603; (2) consolidate the community water supply permitting rules in Parts 652 and 602; and (3) modify the rules, particularly Part 603, to be consistent with recent amendments to the Public Water Supply Operations (PWSO) Act (415 ILCS 45 (2014)). The amended rules became effective on April 15, 2016. The rulemaking is captioned Public Water Supplies: Proposed Amendments to 35 Ill. Adm. Code Parts 601, 602, and 603, docket R15-22.

The Illinois Environmental Protection Agency (IEPA) initiated the rulemaking to streamline the permitting rules, incorporate terminology from the amended PWSO Act, and add provisions for incorporation by reference of national water standards. At second notice, the Joint Committee on Administrative Rules (JCAR) issued a certificate of no objection to the amended rules. JCAR also issued a recommendation to IEPA to promptly repeal the provisions in IEPA's Part 652 that are duplicated in amended Part 602.

Opinions and orders of the Board, hearing transcripts, and other documents in rulemaking records are posted on the Board's website (www.ipcb.state.il.us) and may be downloaded without charge. Hard copies may be obtained from the Clerk's Office (Pollution Control Board, James R. Thompson Center, 100 W. Randolph Street, Suite 11-500, Chicago, IL 60601) upon payment of reproduction fees as prescribed by the Freedom of Information Act.

Board Proposes Second-Notice Amendments to Procedural Rules for Greater Use of Digital Technology in Board Proceedings, R16-17

On April 21, 2016, the Board proposed second-notice amendments to its procedural rules that will decrease the costs of conducting rulemakings and adjudicatory cases. At the same time, the amendments will increase opportunities for citizens to participate in these proceedings. The Board will achieve these objectives primarily by expanding uses of digital technology, including electronic filing, e-mail service, and videoconference hearings. The amendments will reduce travel, printing, copying, and paper mailings, while making it easier to review filings on-line and attend Board hearings. These benefits will inure to the public, the parties, and the Board. In addition, several clarifying amendments were proposed, including specifying how to calculate the timeframe for appealing final Board actions. The second-notice amendments are expected to be considered by the Joint Committee on Administrative Rules at its May 10, 2016 meeting. The rulemaking is captioned Procedural Rule Amendments: Proposed Amendments to 35 Ill. Adm. Code 101 through 125, docket R16-17.

In its second-notice opinion and order, the Board responded to public comments on the first-notice proposal. The comments centered mainly upon four issues. First, although the rules will allow for holding more videoconference hearings, these hearings will not be held far from affected members of the public. Nor will they be held without regard for the parties' preferences. Second, the rules will require some documents to be filed electronically, but not without exceptions when filing in paper is necessary. Third, the rules will enable more documents to be served by e-mail, but only when the recipient has clearly agreed to accept e-mail service instead of receiving paper. Fourth, the rules call for hearing notices to be given in the *Illinois Register* rather than in newspapers, but only when the law does not require newspaper notice. This will occur in only a few types of rulemakings. For them, using the *Illinois Register* will save the Board thousands of dollars per hearing notice, which is especially important during the State's on-going budget crisis.

Opinions and orders of the Board, hearing transcripts, and other documents in rulemaking records are posted on the Board's website (www.ipcb.state.il.us) and may be downloaded without charge. Hard copies may be obtained from the Clerk's Office (Pollution Control Board, James R. Thompson Center, 100 W. Randolph Street, Suite 11-500, Chicago, IL 60601) upon paying reproduction fees as prescribed by the Freedom of Information Act.

Board Proposes "Identical-In-Substance" Amendments to Part 731 UST Rules, R16-16

On April 21, 2016, the Board proposed amendments to update its underground storage tank (UST) rules at 35 Ill. Adm. Code 731. The proposed amendments, on which the Board is accepting public comments, are "identical in substance" (IIS) to corresponding federal UST amendments adopted by the United States Environmental Protection Agency (USEPA) during the last half of 2015. The Board's IIS mandate for UST rules is limited to corrective action requirements. Most of USEPA's

recent amendments, which concern operation and maintenance requirements, deferred systems, and other subjects, fall outside of the IIS mandate. The few USEPA amendments that concern corrective action—*e.g.*, regulating previously deferred UST systems—were incorporated in the Board’s proposed amendments. Additionally, the Board proposed to repeal the requirements for notification of UST activity because they are unrelated to corrective action. The Board invited public comment from the Office of the State Fire Marshal and others on whether notification requirements are within the Board’s UST IIS mandate.

The Board rulemaking is captioned UST Update, USEPA Amendments (July 1, 2015 through December 31, 2015), docket R16-16. Public comments should identify the docket number, R16-16, and must be filed with the Clerk of the Board. Public comments may be filed at the following address:

Pollution Control Board
James R. Thompson Center
100 W. Randolph Street, Suite 11-500
Chicago, IL 60601

Alternatively, public comments may be filed electronically through the Clerk’s Office On-Line (COOL) at www.ipcb.state.il.us. Any questions about electronic filing through COOL should be directed to the Clerk’s Office at (312) 814-3629.

Opinions and orders of the Board, hearing transcripts, and other documents in rulemaking records are posted on the Board’s website (www.ipcb.state.il.us) and may be downloaded without charge. Hard copies may be obtained from the Clerk’s Office (Pollution Control Board, James R. Thompson Center, 100 W. Randolph Street, Suite 11-500, Chicago, IL 60601) upon payment of reproduction fees as prescribed by the Freedom of Information Act.

RESTRICTED STATUS / CRITICAL REVIEW

ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

Division of Public Water Supplies

<http://www.epa.illinois.gov>

Restricted Status/Critical Review

The Environmental Protection Act prohibits the Agency from issuing a construction permit that will cause or extend a violation. A construction permit to expand the distribution system cannot be granted when a water supply has a maximum contaminant level or treatment technique violation, an inadequate source of raw water supply, inadequate treatment plant capacity, finished water storage or distribution system pressure.

A **Restricted Status List** is published quarterly in the Illinois Pollution Control Board Environmental Register to notify those persons considering expansion of a water supply distribution system of that status before large sums of money have been spent on items such as land acquisition, financing and engineering fees.

A companion **Critical Review List** is published concurrently with the Restricted Status List and has the water supplies that are approaching a point where the supply could be placed on Restricted Status. A permit application from a supply on Critical Review will be examined carefully to ensure that the proposed construction will not cause a violation.

IEPA RESTRICTED STATUS LIST

April 2016

The **Restricted Status List** was developed to give additional notification to officials of public water supplies which are in violation of 35 Ill. Adm. Code, Subtitle F: Public Water Supplies, Chapter I or the Illinois Environmental Protection Act.

The Restricted Status List will include all Public Water Supplies for which the Agency has information indicating a violation of any of the following requirements: Finished water quality requirements of 35 Ill. Adm. Code, Part 604, Subparts B and C; maintenance of adequate pressure

on all parts of the distribution system under all conditions of demand; meeting raw water quantity requirements of 35 Ill. Adm. Code 604.502; or maintenance of treatment facilities capable of providing water "assuredly adequate in quantity" as required by Section 18 of the Illinois Environmental Protection Act.

A public water supply on the Restricted Status List will not be issued permits for water main extensions, except for certain limited situations, or unless the supply has been granted a variance from the Illinois Pollution Control Board for the violation, or from permit issuance requirements of Section 39 of the Act.

This list is continually being revised as new information becomes available, and therefore, specific inquiries as to the status of any public water supply should be directed to the Division of Public Water Supplies for final determination.

IEPA CRITICAL REVIEW LIST

April 2016

The **Critical Review List** was developed to give additional notification to officials of public water supplies which may be close to being in violation of 35 Ill. Adm. Code, Subtitle F: Public Water Supplies, Chapter I or the Illinois Environmental Protection Act. A supply will be placed on the Critical Review List when Agency records indicate that it is approaching any of the violations that would place it on the Restricted Status List. This list is continually being revised as new information becomes available, and therefore, specific inquiries as to the status of any public water supply should be directed to the Division of Public Water Supplies for final determination. This list reflects the status as of Month Year.

- * Denotes public water supplies which have been added to the list since the previous publication.
- ** Denotes Change in Nature of Problem
