Subject: R2012-023A

To Whom it may concern,

please adopt a new law that would require all CAFO's to register with the IEPA for the following reasons...

- 1 They are known polluters of the air and water.
- 2 At this point in time the EPA only gets involved after the damage is done and it is too late.
- 3 The extreme use of antibiotics is benefiting stockholders at the cost of the public at large.

Thank you,

George Sinclair
