# Letter from the Chairman

In January, the Board took action on three rulemakings that generated public interest and comment. Below, these recent rulemakings are summarized. As always, information about these proceedings is available through the Clerk's Office Online (COOL) at our Web site at [www.ipcb.state.il.us](http://www.ipcb.state.il.us).

On January 22, 2015, the Board, at the request of the Illinois Environmental Protection Agency (IEPA), extended a stay in the rule entitled Emergency Rulemaking Regarding Regulation of Coke/Coal Bulk Terminals; 35 Ill. Adm. Code Part 213, R14-20. The Board granted IEPA an additional 90 days. However, the Board noted that this docket was opened as an emergency rule docket over a year ago. Absent a rulemaking proposal in the immediate future, the Board stated it is inclined to close this docket at the end of the 90 days.

Also on January 22, 2015, the Board adopted amendments to its procedural rules in Procedural Rule to Implement Electronic Filing and Allow for Public Remarks at Board Meetings, R14-21. The amendments codify procedural standards for remarks by members of the public at the Board's open meetings in accordance with the Open Meetings Act. The rules also permit, with certain limited exceptions, electronic filing in all Board proceedings through the Board's Clerk's Office On-Line or "COOL," as well as service by e-mail of most types of filings.

On January 22, 2015, the Board proposed for second notice amendments in Standards and Requirements for Potable Water Well Surveys and Community Relations Activities Performed in Conjunction With Agency Notices of Threats From Contamination: Proposed Amendments to 35 Ill. Adm. Code 1600, R14-23. These rules implement Section 25d of the Environmental Protection Act (Act), which requires public notification "when contamination poses a threat of exposure above the appropriate remediation objectives on one or more offsite properties" and were originally adopted in 2006. Subsequent legislative and rulemaking actions have created a gap between the environmental concerns that require notice in accordance with the Act. The Board proposed for second notice the rule that address those gaps, which include the exposure routes identified in the Board's Tiered Approach to Corrective Action Objectives rules.

Please visit the Board website at [www.ipcb.state.il.us](http://www.ipcb.state.il.us) for information on the rulemakings listed above as well as other Board rulemaking dockets and contested cases.

Sincerely,

A handwritten signature in black ink that reads "Deanna Glosser". The signature is written in a cursive, flowing style.

Deanna Glosser, Ph.D.  
Chairman

### Rulemaking Update

#### **Board’s Amended Procedural Rules Include Provisions on Public Remarks at Board Meetings, Electronic Filing, and E-Mail Service, R14-21**

On January 22, 2015, the Board adopted final amendments to all parts of its procedural rules in the rulemaking captioned Procedural Rule Amendments to Implement Electronic Filing and Allow for Public Remarks at Board Meetings: Proposed Amendments to 35 Ill. Adm. Code 101-130, docket R14-21. The amendments accomplish two primary objectives. First, in accordance with the Open Meetings Act, the rules codify procedural standards for members of the public to make remarks at the Board’s open meetings. Second, the rules permit, with certain limited exceptions, electronic filing in all Board proceedings through the Board’s Clerk’s Office On-Line or “COOL.” Other amendments include allowing most types of filings to be served by e-mail. In its final adoption order, the Board made only limited clarifying changes and technical corrections to its second-notice proposal.

Opinions and orders of the Board, hearing transcripts, and other documents in rulemaking records are posted on the Board’s website and may be downloaded without charge. Hard copies may be obtained from the Clerk’s Office (Pollution Control Board, James R. Thompson Center, 100 W. Randolph Street, Suite 11-500, Chicago, IL 60601) upon payment of reproduction fees as prescribed by the Freedom of Information Act.

#### **Board Adopts Second-Notice Amendments to “Right-to-Know” Rules, R14-23**

On January 22, 2015, the Board adopted a second-notice opinion and order in the rulemaking captioned Standards and Requirements for Potable Water Well Surveys and Community Relations Activities Performed in Conjunction with Agency Notices of Threats from Contamination: Proposed Amendments to 35 Ill. Adm. Code 1600, docket R14-23. In filing the rulemaking proposal with the Board on June 17, 2014, the Illinois Environmental Protection Agency (Agency) noted that the Board originally adopted the Part 1600 “right-to-know” rules in 2006 to implement Section 25d of the Environmental Protection Act. Generally, Section 25d requires public notification when contamination poses a threat of exposure above appropriate standards. Since the Board adopted the Part 1600 rules, legislative and regulatory actions have occurred that necessitate these rule amendments.

The proposed amendments would require that notice be given to specified members of the public if (1) measured off-site soil gas contamination—from the site where the release occurred—poses a threat of exposure above the appropriate Tier 1 remediation objectives for the current off-site property use or uses; or (2) measured off-site groundwater contamination from volatile chemicals—from the site where the release occurred—poses a threat of indoor inhalation exposure above the appropriate Tier 1 remediation objectives for the current off-site property use or uses. The phrase “Tier 1 remediation objectives” refers to standards in the Board’s risk-based Tiered Approach to Corrective Action Objectives or “TACO” rules at 35 Ill. Adm. Code 742. As at first notice, the second-notice amendments largely reflect the Agency’s proposal. The Board’s proposed amendments will now be reviewed by the Joint Committee on Administrative Rules.

Opinions and orders of the Board, hearing transcripts, and other documents in rulemaking records are posted on the Board’s website and may be downloaded without charge. Hard copies may be obtained from the Clerk’s Office (Pollution Control Board, James R. Thompson Center, 100 W. Randolph Street, Suite 11-500, Chicago, IL 60601) upon payment of reproduction fees as prescribed by the Freedom of Information Act.

Village of Chesterfield (Public Water Supply-Enforcement) – Upon receipt of a complaint accompanied by a proposed stipulation and settlement agreement, and an agreed motion to request relief from the hearing requirement in this public water supply enforcement action involving a Macoupin County facility, the Board ordered publication of the required newspaper notice.

**PCB 15-136** Piasa Motor Fuels, Inc. v. IEPA (UST-Permit Appeal, 90-Day Ext.) – The Board granted this request for a 90-day extension of time to file an underground storage tank appeal on behalf of this Madison County facility.

**PCB 15-137** D&L Landfill, Inc. v. IEPA (UST-Permit Appeal, 90-Day Ext.) – The Board granted this request for a 90-day extension of time to file an underground storage tank appeal on behalf of this Bond County facility.

**PCB 15-138** Dynegy Midwest Generation, LLC v. IEPA (Water-Permit Appeal, NPDES) – The Board accepted for hearing this permit appeal on behalf of this Randolph County facility. The Board reserved ruling on petitioner’s motion for stay of the challenged modification of the permit, to allow the time for IEPA to file a response to run.

**PCB 15-139** Susan M. Bruce v. Highland Hills Sanitary District (Water-Enforcement, Citizens) – No action taken.

**Restricted Status/Critical Review**

The Environmental Protection Act prohibits the Agency from issuing a construction permit that will cause or extend a violation. A construction permit to expand the distribution system cannot be granted when a water supply has a maximum contaminant level or treatment technique violation, an inadequate source of raw water supply, inadequate treatment plant capacity, finished water storage or distribution system pressure. A Restricted Status List is published quarterly in the Illinois Pollution Control Board Environmental Register to notify those persons considering expansion of a water supply distribution system of that status before large sums of money have been spent on items such as land acquisition, financing and engineering fees. A companion Critical Review List is published concurrently with the Restricted Status List and has the water supplies that are approaching a point where the supply could be placed on Restricted Status. A permit application from a supply on Critical Review will be examined carefully to ensure that the proposed construction will not cause a violation. Restricted Status and Critical Review are presented as a combined list with the status of the water supply denoted as either RS (Restricted Status) or CR (Critical Review). The current list reflects the status as of January 1, 2015. An asterisk, \*, beside the water supply indicates public water supplies that have been added to the Restricted Status/Critical Review list since the previous publication.

**Restricted Status List**

The Restricted Status List was developed to give additional notification to officials of public water supplies which are in violation of 35 Ill. Adm. Code, Subtitle F: Public Water Supplies, Chapter I or the Illinois Environmental Protection Act.

The Restricted Status List will include all Public Water Supplies for which the Agency has information indicating a violation of any of the following requirements: Finished water quality requirements of 35 Ill. Adm. Code, Part 604, Subparts B and C; maintenance of adequate pressure on all parts of the distribution system under all conditions of demand; meeting raw water quantity requirements of 35 Ill. Adm. Code 604.502; or maintenance of treatment facilities capable of providing water "assuredly adequate in quantity" as required by Section 18 of the Illinois Environmental Protection Act.

A public water supply on the Restricted Status List will not be issued permits for water main extensions, except for certain limited situations, or unless the supply has been granted a variance from the Illinois Pollution Control Board for the violation, or from permit issuance requirements of Section 39 of the Act.

This list is continually being revised as new information becomes available, and therefore, specific inquiries as to the status of any public water supply should be directed to the Division of Public Water Supplies for final determination.

**Critical Review List**

The Critical Review List was developed to give additional notification to officials of public water supplies which may be close to being in violation of 35 Ill. Adm. Code, Subtitle F: Public Water Supplies, Chapter I or the Illinois Environmental Protection Act.

A supply will be placed on the Critical Review List when Agency records indicate that it is approaching any of the violations that would place it on the Restricted Status List.

This list is continually being revised as new information becomes available, and therefore, specific inquiries as to the status of any public water supply should be directed to the Division of Public Water Supplies for final determination.

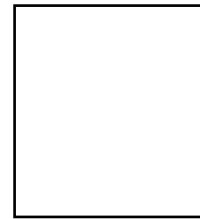

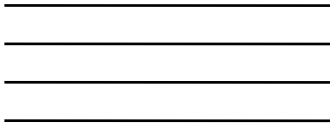

The Illinois Pollution Control Board is an independent five-member board that adopts environmental control standards, rules on enforcement actions, and other environmental disputes for the State of Illinois.

The *Environmental Register* is published monthly by the Board, and contains updates on rulemakings, descriptions of final decisions, the Board's hearing calendar, and other environmental law information.
