

## **The Board Adopts Rules for Hospital/Medical/Infectious Waste Incinerators**

The Board, on September 22, 2011, adopted amendments to the Board's air quality standards rules for "Hospital/Medical/Infectious Waste Incinerators" (HMIWI). The proposed rules were filed on December 23, 2010 by the Illinois Environmental Protection Agency (EPA) and docketed as In the Matter of: Amendments to 35 Ill. Adm. Code Part 229: Hospital/Medical/Infectious Waste Incinerators (R11-20).

The IEPA proposal reflects the United States Environmental Protection Agency's (USEPA) October 2009 amendments to the federal air quality standards, including new source performance standards (NSPS), and emissions guidelines (EG). Changes include revised emissions standards that are more stringent than existing ones, revised waste management plan provisions for greater flexibility in demonstrating compliance, and removal of an existing startup, shutdown, and malfunction provision.

The compliance date for the new rules is January 1, 2014. The Stericycle, Inc. facility in Clinton, the only existing facility to which the rules apply, has testified that it believes it can comply with the rules as amended.

These rules will become effective upon filing with the Secretary of State.

Opinions and orders of the Board, hearing transcripts, and other documents in rulemaking records are posted on the Board's Web site and may be downloaded from the Web without charge. Hard copies may be obtained for \$.75 per page from the Clerk's office
