Subject: RE: Part 611 Adoption (message 1 of at least 2)

As ever, I appreciate the meticulous care with which JCAR staff reviews the rules submissions that I make. I have reviewed each observation below and the pertinent documents. I respond to each of your comments as follows:

1. There is an error in presentation of the document title. The document title literally reads as follows: "TECTA™ EC/TC medium and the TECTA™ Instrument: a Presence/Absence Method for the Simultaneous Detection of Total Coliforms and *Escherichia coli* (*E. Coli*) in Drinking Water." I have marked two appearances of the full document title in Section 611.102(a) and (b) for future correction the next time Part 611 is open for amendments.
2. The omission of the comma was, indeed, inadvertent error. I have marked addition of the comma for a future rulemaking.
3. Indeed, the "21" should have been removed with the rest of the former street address. I have marked it for future correction.
4. The name "silvex" is an alternative trade name for 2,4,5-TP, so the name should appear in parentheses because it is not a separate member of the series.

If you find more, I am prepared to either mark errors for future correction or to explain the appearance of the text.

Thanks again.

John T.: We do not currently have a reserved docket for the next SDWA update. When we do reserve the docket, I will request that it get the docket number R16-4, according to my convention for requesting the numbers. When we have a reserved docket number assigned, I will request that you post this e-mail chain as a public comment in that docket. For now, in order to preserve the comments, please post this e-mail chain as a public comment in docket R15-6. See me with any questions.

Subject: Part 611 Adoption (message 1 of at least 2)

I'm wading through your adopted Part 611, and had the following questions come up in the first half:

- 1) Sec. 102: Tecta EC/TC P-A Test: before "Presence/Absence" you have a quotation mark, which appears to create an odd number of quote marks. Did you intend to use another form of punctuation here?
- 2) "Standard Methods", 22nd ed: Method 9223 B: Did you intend to omit the comma (in your proposed version) after "Colilert (r) Test"?
- 3) Palintest, Ltd., address: You list "21 1455 Jamike Avenue" → Should the "21" be stricken as well?
- 4) Standard Methods Online, Board Note: You struck the opening parenthesis between "(silvex)," and "dalapon". Did you mean to strike the ")," after silvex as well, or am I misreading how the list should go?

That's all I've found so far, but I wanted to send you this as quickly as possible; will update you in the morning if I find anything else.

Thanks so much for your consideration.

Jonathan
