**PUBLIC NOTICE**

On June 12, 2015, Exelon Generation LLC filed a Petition to Approve Alternative Thermal Effluent Limitations with the Illinois Pollution Control Board (PCB Dkt. # 15-204). Exelon is seeking alternative thermal effluent limitations for its Dresden Nuclear Generation Station, located in Grundy County, near Morris, Illinois, pursuant to 35 Ill. Adm. Code § 304.141(c), Section 316(b) of the Clean Water Act and 35 Ill. Adm. Code Part 106. Subpart K, Dresden Nuclear Generating Station produces electricity. As part of the electric generating process, from June 15 through September 30, the facility draws water from the Kankakee River, heats the water, circulates the heated water through a cooling pond system, and discharges the heated water from the cooling pond into the Illinois River. Exelon is seeking alternative thermal effluent limitations in lieu of the limitations set forth in 35 Ill. Adm. Code §§ 303.331 and 35 Ill. Adm. Code § 302.102(b)(6). Specifically, Exelon requests the following alternative limitations: during the period June 15 through September 30, the temperature of the Dresden Station discharge shall not exceed 90° F more than 10% of the time in the period and will never exceed 95° F, provided that (1) discharges above 90° F are allowed only when Dresden Station intake temperature is above 90° F, and (2) any single episode of such discharges does not exceed 24 hours in duration.

Exelon Generation LLC is located at 10 South Dearborn Street, Chicago, Illinois 60603. Any person may cause a public hearing to be held in the above-described proceeding by filing a hearing request with the Illinois Pollution Control Board within 21 days after the date of publication of this notice. The hearing request should clearly indicate the docket number for the proceeding, as found in this notice, and may be filed with the Clerk of the Board, Illinois Pollution Control Board, 100 W. Randolph Street, Suite 11-500, Chicago, Illinois 60601.
