Background Information

This site was initially inspected pursuant to a complaint in 2012. Subsequent to the complaint investigation, two Administrative Citation Warning Notices (ACWN) and, in 2017, an Administrative Citation (AC) were issued to the property owner and site operator. The AC was eventually withdrawn by the county due to substantial compliance efforts by the owner and/or operator, and the understanding that the county would monitor the site for continued compliance.

This site is still owned by Bruce Reese, 2042 Dillinger Road, Carbondale, Illinois 62901

Attachment: Pages 1&2). This address is his mailing address and not the address listed on the attachment. Bryan Bruce lives on the property in a mobile home and the site address is 2186 Dillinger, Carbondale, Illinois 62901.

General Remarks

I conducted an inspection of the property on September 27, 2018. Weather conditions at the time of the inspection were: overcast with low winds and an air temperature of approximately 59°F. All photos taken during the inspection are identified on the attached site sketch.

As I was driving towards the property, I observed what appeared to be open dumped waste scattered throughout the site. I parked the vehicle at the east end of the site and I observed from this location an area of open dumped waste (**Photos 1 & 2**).

I began my inspection and walked towards the front door of the mobile home. I knocked and Tabitha Nix, Bryan Bruce's daughter, came to the door and decided to accompany me throughout the inspection.

Following is a partial list of the types of open dumped waste or in some cases specific items, I observed at this site, by photo groups:

- **Photos 1 – 4**, eastern end of property: wooden pallets, demolition and/or construction debris, household trash, used/waste tires, plastic containers and other plastic items, lawn chair, aluminum cans, toys, various metal items, a rolled-up tarpaulin, dimensional

lumber, a wheelbarrow, coolers, radio/cassette player, furniture, various equipment, and items not readily identifiable.

- **Photos 5 – 9**, surrounding the mobile home: various equipment, furniture, a plastic bucket and other plastic items, metal items, fishing poles, loose and bags of household waste, a table umbrella, a deteriorating hot tub filled with metal and plastic items, demolition and/or construction debris and items not readily identifiable.
- **Photos 10**, in and surrounding the old burn area/fire ring: a recliner, a propane cylinder, a table, a bicycle, wooden pallet and a plastic tote filled with unknown material.
- **Photos 11 – 13**, western side of property: an abandoned motorhome, a waste pile overgrown with vegetation, various metal and plastic items, demolition and/or construction debris, a chiminea fireplace, a folder chair, and other items not readily identifiable.

There have been several field visits and telephone conversations to inform the respondents of the site's return to non-compliance. During this inspection, I observed little progress towards the clean-up of the site and observed additional open dumping of waste.

At the time of the inspection, the items listed above were not in use, were not usable in their current condition and were not stored in such a way as to protect for any future use. Also, at the time of the inspection, the items were unorganized and stored in an unsightly manner. The total volume of waste observed was approximately 60 cubic yards.

After some discussion with Ms. Nix, I ended my inspection at 1:33 p.m.

Violations Observed:

(21)(d)(1): Conduct any waste-storage, waste-treatment, or waste-disposal operation: Without a permit: : At the time of the inspection, the Jackson County Health Department (Health Department) had not received documentation from the Illinois Environmental Protection Agency (Agency) that the site owner/operator had been issued a permit to conduct a waste-storage, waste-treatment or waste-disposal operation.

(21)(d)(2): In violation of any regulations or standards adopted by the Board: During the inspection, violations of regulations or standards adopted by the Board regarding the operation of a waste-storage, waste-treatment or waste-disposal site were observed. During the inspection,
