

ILLINOIS POLLUTION CONTROL BOARD

October 27, 2016

IN THE MATTER OF: )  
DEFINITION OF VOM UPDATE, USEPA ) R17-2  
REGULATIONS (January 1, 2016 through ) (Identical-in-Substance Rulemaking - Air)  
June 30, 2016) )

Proposed Rule. Proposal for Public Comment.

OPINION AND ORDER OF THE BOARD (by J.A. Burke):

The United States Environmental Protection Agency (USEPA) expanded a single exclusion from the federal definition of “volatile organic compound” (VOC) codified at 40 C.F.R. 51.100(s). Section 9.1(e) of the Illinois Environmental Protection Act (Act) (415 ILCS 5/9.1(e) (2014)) requires the Board to likewise expand the exclusion from ozone regulation “due to negligible photochemical reactivity.” 415 ILCS 5/9.1(e) (2014). In addition, Section 9.1(e) of the Act requires the Board to use the identical-in-substance procedure of Section 7.2(b) of the Act (415 ILCS 5/7.2(b) (2014)).

Specifically, the Board proposes amendments to the Illinois definition of “volatile organic material” (VOM) (35 Ill. Adm. Code 211.7150) that are identical in substance to the USEPA action. The Board further includes corrections to chemical names in the list of excluded compounds.

The Board will submit the proposed amendments for publication in the *Illinois Register* and will accept public comments for 45 days after publication. The Board will also conduct a public hearing on December 7, 2016. The Board will then adopt the final rules. The Board requests comment on the rules.

The Board expects to adopt final rules no later than February 25, 2017.

**SUMMARY OF PROPOSED AMENDMENTS**

**Federal Regulations Implemented**

USEPA took one action that affected the federal definition of VOC during the first half of 2016 and requires corresponding amendments to the Illinois definition of VOM.

**February 25, 2016 (81 Fed. Reg. 9339)**

USEPA revised the existing exclusion of one alkane-carboxylic acid ester compound in the list of chemical species excluded from the federal definition of VOC.

**TIMETABLE TO COMPLETE RULEMAKING**

The Board will complete this rulemaking no later than February 25, 2017 (one year after the earliest USEPA action included in the docket). The Board proposes the following schedule:

<b>Final Adoption:</b>	<b>February 25, 2017</b>
Board order proposing amendments:	October 27, 2016
Submission for <i>Illinois Register</i> publication:	October 31, 2016
Estimated <i>Illinois Register</i> publication date:	November 10, 2016
Date of public hearing:	December 7, 2016
Estimated end of 45-day public comment period:	December 27, 2016
Board order adopting amendments:	January 19, 2017
Estimated filing and effective date:	January 30, 2017
Estimated <i>Illinois Register</i> publication date:	February 10, 2017

### **PUBLIC COMMENTS**

The Board invites public comment on the proposed amendments. The Board will receive public comments until at least 45 days after a notice of these proposed amendments appears in the *Illinois Register*. The Board specifically requests comments on revision of the listing of exempt compounds:

1. Should the Board revise the listing to include the Chemical Abstract Service (CAS) number for each individual chemical compound on the list?
2. Should the Board revise the listing to include the International Union of Pure and Applied Chemistry (IUPAC) name for each individual chemical compound on the list?

### **PUBLIC HEARING & RULEMAKING RECORD**

The Board expects that the Illinois Environmental Protection Agency (Agency) will submit the present amendments as a revision to the Illinois State Implementation Plan (SIP) for ozone pursuant to section 110 of the federal Clean Air Act (42 U.S.C. § 7410(a) (2014) and the implementing USEPA regulations. *See* 40 C.F.R. 51.102 and appendix V (2016).

As authorized by 415 ILCS 5/9.1(e), the Board scheduled a public hearing to allow the public to comment on the proposed amendments and the anticipated SIP revision. The Board will conduct that hearing by videoconference between the Board's offices in Chicago and Springfield, as follows:

1:45 p.m., Thursday, December 7, 2016

James R. Thompson Center  
Illinois Pollution Control Board Hearing Room  
100 West Randolph Street, Room 11-512  
Chicago

and

Sangamo Building  
Illinois Pollution Control Board Hearing Room  
1021 North Grand Avenue  
Springfield

The record in this docket will include all documents pertaining to this proceeding. All documents in the record are publicly available as provided in 2 Ill. Adm. Code 2175. The documents are also freely available online at the Board's webpage: [www.ipcb.state.il.us](http://www.ipcb.state.il.us).

The record will not include a copy of the following documents, which are publicly available from other sources:

- *Federal Register* notices;
- Federal statutes and regulations; and
- Illinois statutes and regulations.

The Board submitted a Notice of Public Information on Proposed Rules for publication in the *Illinois Register* on October 28, 2016. In that Notice, the Board describes the hearing date and time and sets forth information to obtain documents and participate in this proceeding. Direct any questions to:

After the hearing and public comment period, the Board promptly will issue an order adopting final rule amendments. The Board will then file the amendments with the Office of the Secretary of State, and a Notice of Adopted Amendments will appear in the *Illinois Register*. Any Agency submission of the associated SIP revision to USEPA would follow that Notice.

The Board has determined that the foregoing will satisfy the federal requirements for SIP revision, as set forth in 33 U.S.C. § 7410(a) (2013) and 40 C.F.R. 51.102, as to subjects included in this proceeding.

## **DISCUSSION**

### **Federal Actions in This Rulemaking**

The USEPA action requiring amendments to the Illinois regulations are summarized below.

**February 25, 2016 (81 Fed. Reg. 9339)**

USEPA revised the existing exclusion of *tertiary*-butyl acetate (*t*-Bac) in the list of chemical species excluded from the federal definition of VOC. Excluded from the definition of VOC, emissions of *t*-Bac are excluded from regulatory control as a precursor of tropospheric ozone (smog).

USEPA excluded *t*-Bac in 2004.<sup>1</sup> That exclusion, however, related only to controlling emissions of *t*-Bac. *t*-Bac remained a VOC for the purposes of recordkeeping, emissions reporting, photochemical dispersion modeling, and inventory requirements that apply to VOC. *See* 81 Fed. Reg. at 9340.

USEPA removed paragraph (s)(5) from the federal definition of VOC on February 25, 2016. *See* 40 C.F.R. 51.100(s) (2016). USEPA added *t*-Bac to the list in paragraph (s)(1). This removal of the recordkeeping and reporting requirements for *t*-Bac completed the exclusion of *t*-Bac from the definition of VOC. *t*-Bac is now excluded from all regulation as a precursor of tropospheric ozone.

The International Union of Pure and Applied Chemistry (IUPAC)-accepted names of *t*-Bac are as follows:

*tert*-butyl acetate  
*tert*-butyl acetic acid ester  
 1,1-dimethylethyl acetic acid ester

Further identifying information for the excluded compound is as follows:

CAS no.: 540-88-5  
 chemical formula: CH<sub>3</sub>COOC(CH<sub>3</sub>)<sub>3</sub>  
 molecular formula: C<sub>6</sub>H<sub>12</sub>O<sub>2</sub>  
 alternative common name: *t*-butyl acetate; *t*-Bac

In an unrelated amendment, USEPA removed of the hyphen from between the “methoxy” and “propane” moieties to correct the format of the chemical name “1,1,1,2,2,3,3-heptafluoro-3-methoxypropane.”

**The Present Board Action.** The Board incorporated the USEPA revisions to the exclusion of *t*-Bac into the Illinois definition of VOM with minimal deviation from the federal text. The Board found one minor revision to the federal text necessary. The Board further found errors in the text of 40 C.F.R. 51.100(s).

---

<sup>1</sup> 69 Fed. Reg. 69298 (Nov. 29, 2004). The Board incorporated the USEPA exclusion into the Illinois definition of VOM in Exemptions from the Definition of VOM, USEPA Amendments (July 1, 2004 through December 31, 2004), R05-16 (May 19, 2005).

The Board removed 35 Ill. Adm. 211.7150(e) in its entirety to correspond with USEPA's removal of corresponding 40 C.F.R. 51.100(s)(5). USEPA added "t-butyl acetate" to the list of excluded compounds in 40 C.F.R. 51.100(s)(1). The Board previously added "tertiary-butyl acetate" to the list of excluded compounds in 35 Ill. Adm. Code 211.7150(a) in docket R05-16. Thus, adding *t*-BAC now is not necessary. USEPA, however, alphabetized the *t*-BAC's position in the federal based on "tert." The Board retains the name "tert-butyl acetate," and the alphabetized position in the list based on "butyl," and the Board added the IUPAC name, "1,1-dimethylethyl acetic acid ester," in parentheses.

The Board removed the last three sentences from 35 Ill. Adm. Code 211.7150(a). The Board added those sentences in response to Agency concerns raised after the initial exclusion of *t*-BAC. The Agency related to the Board that USEPA was concerned over the appearance of *t*-BAC in the list in 35 Ill. Adm. Code 211.7150(a). USEPA saw a potential for confusion that *t*-BAC was totally excluded from the definition of VOM. *See Exemptions from the Definition of VOM, USEPA Amendments (January 1, 2007 through June 30, 2007), R08-6 (Jan. 10, 2008) at pp. 3-7.*

**Request for Comments.** The Board requests comments on the incorporation of the February 25, 2016 USEPA revisions to the exclusion of *t*-BAC from the definition of VOM.

### **Revisions**

In an identical-in-substance proceeding, the Board must adopt the verbatim text of federal regulations except for (1) changes needed for compliance with the Illinois Administrative Code; (2) technical changes that do not change the scope or meaning of the regulations; and (3) typographical and grammatical errors. In addition, the Board must not adopt USEPA rules that are not applicable to Illinois or "things which are outside the Board's normal functions." *See* 415 ILCS 5/7.2(a), (a)(1), (a)(2), and (a)(7) (2014). Thus, the Board made only minor, non-substantive deviations from the federal text described below.

### **Errors in the Federal Text**

The Board's review of the text of 40 C.F.R. 51.100(s)(1), as amended by USEPA on February 26, 2016, disclosed nine minor errors in chemical names. The Board previously corrected eight of these errors in 35 Ill. Adm. Code 211.7150(a). The Board now corrects the ninth error derived from the federal text in the listing of "1,1,1,2,2,3,4,5,5,5-decafluoro-3-methoxy-4-trifluoromethylpentane."

The Identical-in-Substance Rulemaking Addendum (Proposed) (IIS-RA(P)) fully lists the differences between the text of the USEPA amendments and the Board's language in this rulemaking. The Board included the IIS-RA(P) in the docket for this rulemaking, available on the Board's website. Table 3 in the IIS-RA(P) for this proceeding lists the federal errors and the Board's corrections of those errors. Table 2 in the IIS-RA(P) lists the correction that the Board makes today.

## **Revisions to Chemical Identifiers**

To make the list easier to use, the Board proposes amending the list of excluded compounds to name each excluded compound by its systematic name and registry number, eliminating structural formulae where they appear, and presenting common names parenthetically.

This does not apply to the exclusions listed as classes of chemical compounds. Those exclusions identify so many individual chemical compounds that specific identification is not possible.

Chemical identification can be problematic. Some chemical have several commonly used names, some of which may identify several isomers. Identification of a particular chemical can be difficult. To the extent a chemical name can identify multiple compounds or isomers, it is ambiguous.

Two examples of ambiguous chemical names from the list of excluded compounds were chlorodifluoroethane and dichlorofluoroethane. These were the names that USEPA originally used to identify the excluded compounds. *See* 54 Fed. Reg. 1987, 1988 (Jan. 18, 1989). Each name describes three chemical isomers. USEPA later more specifically named the two chemicals 1,1-dichloro-1-fluoroethane and 1-chloro-1,1-difluoroethane, to each embrace a single isomer. *See* 40 C.F.R. 51.100(s)(1) (1992).

There are several conventions for identifying chemicals with varying precision. For example, acetone is a common name for an excluded compound that also bears the common name dimethylketone. The International Union of Pure and Applied Chemistry (IUPAC) has developed a system of nomenclature for chemical compounds. Acetone bears the IUPAC name propan-2-one. USEPA lists this compound as “acetone” in 40 C.F.R. 51.100(s)(1) (2016). The Board parenthetically added “dimethyl ketone or propan-2-one” in corresponding 35 Ill. Adm. Code 211.7150.

For the purpose of obtaining greater certainty in chemical identification, chemists have developed various non-name identifiers. The identifier of interest to the Board is the Chemical Abstract Service (CAS) number developed by the American Chemical Society.<sup>2</sup> CAS numbers are in widespread use, and a single CAS number identifies only one chemical isomer.<sup>3</sup>

Returning to the examples of chlorodifluoroethane and dichlorofluoroethane, the IUPAC names of the isomers and their CAS numbers are as follows:

---

<sup>2</sup> There are several other systematic identifiers. The Food and Drug Administration uses the Unique Ingredient Identifier (UNII). *See* <https://fdasis.nlm.nih.gov/srs/srs.jsp>. There is the Simplified Molecular Input Line-Entry System (SMILES) (*see* <http://www.daylight.com/smiles/index.html>) and IUPAC’s similar International Chemical Identifier (InChI) developed for computerized chemical information. *See* <https://iupac.org/who-we-are/divisions/division-details/inchi/>.

<sup>3</sup> *See* <https://www.cas.org/content/chemical-substances/faqs#q1>.

Chlorodifluoroethane isomers:

1-chloro-1,1-difluoroethane (CAS no. 75-68-3)—the excluded isomer  
 1-chloro-1,2-difluoroethane (CAS no. 338-64-7)  
 1-chloro-2,2-difluoroethane (CAS no. 338-65-8)  
 chlorodifluoroethane mixed isomers (CAS no. 25497-29-4)

Dichlorofluoroethane isomers:

1,1-dichloro-1-fluoroethane (CAS no. 1717-00-6)—the excluded isomer  
 1,1-dichloro-2-fluoroethane (CAS no. 25167-88-8)  
 1,2-dichlorofluoroethane (CAS no. 430-57-9)

Table 4 in the IIS-RA(P) for this rulemaking lists the exclusions from the definition of VOM using the designations used by USEPA, listing IUPAC names, CAS numbers, and commonly used informal names for each.

The Board requests public comments on revising the chemical identifiers used in the list of excluded compounds in the definition of VOM.

**HISTORICAL SUMMARY OF EXCLUSIONS FROM THE DEFINITION  
OF VOM AND IMPLEMENTATION IN ILLINOIS**

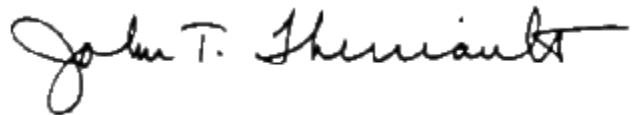

The Board maintains a historical summary of the State and federal definitions of VOM. That summary traces the evolution of the federal *Recommended Policy on the Control of Volatile Organic Compounds*; USEPA's codification of the policy as 40 C.F.R. 51.100(s); subsequent amendments of 40 C.F.R. 51.100(s); and the several rulemakings that the Board undertook to accommodate federal amendments. The historical summary is available on the Board's website: [www.ipcb.state.il.us](http://www.ipcb.state.il.us).

**ORDER**

The Board directs the Clerk to provide notice in the *Illinois Register* of the appended proposed amendments to the definition of VOM at 35 Ill. Adm. Code 211.7150.

IT IS SO ORDERED.

I, John T. Therriault, Clerk of the Illinois Pollution Control Board, certify that the Board adopted the above opinion and order on October 27, 2016, by a vote of 5-0.

## SUBPART B: DEFINITIONS

### Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compound (VOC)

“Volatile organic material” (also “VOM”) or “volatile organic compound” (also “VOC”) means any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate, that participates in atmospheric photochemical reactions.

- a) This definition of VOM includes any organic compound that participates in atmospheric photochemical reactions, other than the compounds listed in this subsection (a). USEPA has determined that the compounds listed in this subsection (a) have negligible photochemical reactivity. USEPA has excluded the listed negligibly-reactive compounds from the definition of VOM for purposes of VOM limitations or VOM content requirements. However, USEPA has required that certain of these compounds be considered VOM for purposes of recordkeeping, emissions reporting, and inventory requirements, as described in subsection (e) of this Section.

- b) For purposes of determining VOM emissions and compliance with emissions limits, VOM will be measured by the test methods in the approved implementation plan or 40 CFR 60, appendix A, incorporated by reference at 35 Ill. Adm. Code 215.105, 218.112, and 219.112, as applicable, or by source-specific test methods that have been established pursuant to a permit issued under a program approved or promulgated under Title V of the Clean Air Act; under 40 CFR 51, subpart I or appendix S, incorporated by reference at 35 Ill. Adm. Code 218.112 and 219.112; or under 40 CFR 52.21, incorporated by reference at 35 Ill.

Adm. Code 218.112 and 219.112, as applicable. Where such a method also measures compounds with negligible photochemical reactivity, these negligibly-reactive compounds may be excluded as VOM if the amount of such compounds is accurately quantified and the exclusion is approved by the Agency.

- c) As a precondition to excluding these negligibly-reactive compounds as VOM, or at any time thereafter, the Agency may require an owner or operator to provide monitoring or testing methods and results demonstrating, to the satisfaction of the Agency, the amount of negligibly-reactive compounds in the source's emissions.
- d) The USEPA will not be bound by any State determination as to appropriate methods for testing or monitoring negligibly-reactive compounds if such determination is not reflected in any of the test methods in subsection (b) ~~of this Section.~~
- e) ~~The following compound is VOM for the purposes of all recordkeeping, emissions reporting, photochemical dispersion modeling and inventory requirements that apply to VOM, and it must be uniquely identified in emission reports, but it is not VOM for the purposes of VOM emissions limitations or VOM content requirements: t-butyl acetate.~~
