RECOMMENDATION

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board, 35 Ill. Adm. Code 125.204.

- 1. On December 6, 2013, the Illinois EPA received a request from Wabash Valley Service Company (log number TC-24-13, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.
- 2. The applicant's address is: 206 E. Sycamore St. Ridgway, IL 61979
- 3. The proposed water pollution control facilities in this request are located at Section 30, T8S, R9E of 3rd PM in Gallatin County, at the above street address and consist of the following:

The five (5) dry fertilizer concrete operational containment structures for the following operations: end loader transfer, unloading, blending, loading of dry bulk fertilizer, two bulk dry fertilizer operational containment structures (DFOC1 and DFOC-2) and the buildings over DFOC-1 and DFOC-2. These structures were permitted under the enclosed Agrichemical Facility Permit No. AC92111778, Log. No. 11100459, issed December 12, 2011, and the Agrichemical Facility Permit No. AC92111778, Log. No. 08039298, issued March 26, 2008.

These facilities are used to facilitate the cleanup of dry fertilizer spillage, thereby reducing contaminated water runoff, and are further described in Exhibit A.

4. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2012), defines "pollution control facilities" as:

THIS FILING IS SUBMITTED ON RECYCLED PAPER

"any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: (a) eliminating, preventing, or reducing air or water pollution ...or (b) treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property."

- 5. Pollution control facilities are entitled to preferential tax treatment, 35 ILCS 200/11-5.
- 6. Based on the information in the application and the purpose of the facilities, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the requested tax certification.

Re:

Ken Ochs

Wabash Valley Service Co. - Ridgway, IL Recommendation of Tax Certification

Log # TC-24-13

Property Identification # 1RI-062-05; 2-RI-121-03

The Bureau of Water received a request on December 6, 2013 from Wabash Valley Service Company for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 II. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Ken Ochs Wabash Valley Service Co. 206 E. Sycamore St. Ridgway, IL 62979

Section 30, T8S, R9E of the 3rd PM in Gallatin County.

The five (5) dry fertilizer concrete operational containment structures for the following operations: end loader transfer, unloading, blending, loading of dry bulk fertilizer, two bulk dry fertilizer operational containment structures (DFOC-1 and DFOC-2) and the buildings over DFOC-1 and DFOC-2. These structures were permitted under the endorsed Agrichemical Facility Permit No. AC92111778, Log No. 11100459 issued December 12, 2011 and Agrichemical Facility Permit No. AC92111778, Log No. 08039298 issued March 26, 2008.

These facilities are further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Jenny Larsen at 217/782-0610.

Wabash Valley Service Company 909 N. Court St. Grayville, IL 62844

Dear Agrichemical Facility Permit Applicant:

Enclosed is the construction and/or operating permit modification as approved by the Illinois Department of Agriculture and endorsed by the Illinois Environmental Protection Agency. Please carefully review and follow the Standard and Special Conditions of the Permit and Endorsement.

Prior to construction, the Department and the Agency caution you to carefully evaluate past operational practices at the site. Should you suspect environmental (soil, surface or groundwater) contamination, it is advisable to determine the extent and severity of such contamination prior to construction and remediate these areas as required.

We appreciate your cooperation with the Department in this process. Should you have any questions or comments regarding your Agrichemical Facility Permit, please contact the Agrichemical Containment Program at (217) 785-0780.

Sincerely,

Warren D. Goetsch, P.E.

Chief, Bureau of Environmental Programs

A permit modification is hereby granted to the above designated permittee to construct and/or operate an agrichemical facility which was previously approved under the above referenced permit number. The facility and associated permit has been modified as follows:

DRY FERTILIZER STRUCTURES

Installation and operation of a reinforced concrete operational containment structure with the greatest dimensions measuring 40' (width) x 138' (length). All endloader transfer of bulk dry fertilizer between storage and the blender shall be performed upon the herein permitted structure.

Installation and operation of a reinforced concrete operational containment structure measuring 12' (width) x 24' (length). The unloading of bulk dry fertilizer transportation and application equipment shall be performed upon the herein permitted structure.

Installation and operation of a reinforced concrete operational containment structure measuring 10' (width) x 68' (length). All blending of bulk dry fertilizer shall be performed upon the herein permitted structure.

Installation and operation of a reinforced concrete operational containment structure with the greatest dimensions measuring 35.4' (width) x 43.6' (length). The loading of bulk dry fertilizer transportation and application equipment shall be performed upon the herein permitted structure.

Installation and operation of a reinforced concrete operational containment structure measuring 24' (width) x 30' (length). The loading of bulk dry fertilizer transportation and application equipment shall be performed upon the herein permitted structure.

The bulk dry fertilizer structures **DFOC-1** and **DFOC-2** previously permitted under Permit No. AC92111778 issued March 26, 2008.

This permit modification has also been reviewed and approved by the Illinois Environmental Protection Agency per the attached permit modification endorsement. The expiration date of this permit modification shall remain the same as issued on the original permit.

State of Illinois Department of Agriculture

Wabash Valley Service Co.AGRICHEMICAL CONTAINMENT PERMIT

Page: 2

All Special Conditions on the original permit issued are also applicable to this permit unless specifically deleted or revised in this permit.

SPECIAL CONDITION 1: The permittee shall operate the exposed dry fertilizer operations pursuant to 8 Illinois Administrative Code 255.140 (a), (c) and (d).

THE STANDARD CONDITIONS OF ISSUANCE ON THE REVERSE SIDES OF THIS MUST BE COMPLIED WITH IN FULL.

Warren D. Goetsch, P.E.

Chief, Bureau of Environmental Programs

State of Illinois Department of Agriculture

Wabash Valley Service CompanAGRICHEMICAL FACILITY PERMIT

RELEASABLE

Operation of an existing reinforced concrete operational containment structure measuring 16' (width) x 39.7' (length) x 0.6' (depth) with a total design capacity of 360.0 cubic feet (ft.³). The floor shall slope to a single sump measuring 1.5' (diameter) x 0.75' (depth) to facilitate the collection and recovery of all escaped product and/or agrichemical wastewater. All recovered effluent shall be transferred to one (1) of two (2) 550 gallon recovery tanks with a manually activated sump pump. Segregation shall be performed based upon the applicable target crop and label use. All blending of bulk dry fertilizer, including the impregnation of dry fertilizer with pesticides shall be performed upon the herein permitted structure. This structure shall be referred to as **DFOC-1**

Operation of an existing reinforced concrete operational containment structure with the greatest dimensions measuring 34' (width) x 48' (length) x 0.6' (depth) with a total design capacity of 794.0 cubic feet (ft.3). The floor shall slope to a single sump measuring 1.5' (width) x 1.5' (length) x 0.75' (depth) to facilitate the collection and recovery of all escaped product and/or agrichemical wastewater. All recovered effluent shall be transferred to one (1) of the two (2) aforementioned 550 gallon recovery tanks with a manually activated sump pump. Segregation shall be performed based upon the applicable target crop and label use. All loading of bulk dry fertilizer, including dry fertilizer impregnated with pesticides shall be performed upon the herein permitted structure. This structure shall be referred to as DFOC-2.

There shall be no discharge of wastewater from the herein permitted facilities.

This permit has been reviewed and approved by the Illinois Environmental Protection Agency per the attached permit endorsement. This permit is subject to standard conditions on the reverse side of this document and the following special conditions:

SPECIAL CONDITION It. The permittee shall provide backflow protection in accordance with the Illinois Department of Public Health Plumbing Code (77 Ill. Adm. Code 890) and the Illinois Environmental Protection Agency's Technical Policy Statement (35 Ill. Adm. Code 653.803(c)(4).

Practices Plan, the permittee shall not discharge accumulated precipitation from the herein containment structures.

SPECIAL CONDITION 3: The permittee shall operate the herein permitted operational containment structure pursuant to 8 Illinois Administrative Code 255.90 (a) (b) (c) and (f), and 8 Illinois Administrative Code 255.110 (c).

SPECIAL CONDITION 4: The permittee shall perform all operations involving the impregnation of bulk dry fertilizer with pesticides, in accordance with 8 Illinois Administrative Code 255.150. The permittee shall maintain and manage the operational containment structure employed for the pesticide inductor pursuant to 8 Illinois Administrative Code 255.90.

ILLINOIS DEPARTMENT OF AGRICULTURE = AGRICHEMICAL FACILITY PERMIT

aforementioned 1500 gallon recovery tanks with a manually activated sump pump. Segregation shall be performed based upon the applicable target crop and label use. All bulk liquid fertilizers shall be stored within the said structure.

RELEASABLE

DRY FERTILIZER STRUCTURES:

Installation and operation of a bulk dry fertilizer storage and operations building measuring 128' (width) x 60' (length) with an estimated total storage capacity of 3200 tons. The structure is composed of eight (8) bins, each bin measuring 16' (width) x 48' (length) with an estimated total storage capacity of 400 tons each. An aisle measuring 128' (width) x 12' (length) provides operational containment for the transfer of bulk dry fertilizer from the storage bin to the transfer leg with hopper. All bulk dry fertilizers shall be stored within the said structure.

Installation and operation of a reinforced concrete operational containment structure measuring 26' (width) x 72' (length). All unloading of bulk dry fertilizers and the transfer of said material into the storage structure shall be performed upon the said structure.

Installation and operation of a reinforced concrete operational containment structure measuring 39' (width) x 20' (length) x .6' (depth) with a total design capacity of 313 cubic feet (ft³). The floor shall slope to a single sump measuring 1.5' (diameter) x .75' (depth) to facilitate the collection and recovery of all escaped product and/or agrichemical wastewater. All recovered effluent shall be transferred to one (1) of two (2) 550 gallon recovery tanks with a manually activated sump pump. Segregation shall be performed based upon the applicable target crop and label use. All blending of bulk dry fertilizers, including the impregnation of pesticides on bulk dry fertilizer, shall be performed upon the herein permitted structure.

Installation and operation of a reinforced concrete operational containment structure with the greatest dimensions measuring 48' (width) x 34' (length) x .6' (depth) with a total design capacity of 765 cubic feet (ft³). The floor shall slope to a single sump measuring 1.5' (width) x 1.5' (length) x .72' (depth) to facilitate the collection and recovery of all escaped product and/or agrichemical wastewater. All recovered effluent shall be transferred to one (1) of the two (2) aforementioned 550 gallon recovery tanks with a manually activated sump pump. Segregation shall be performed based upon the applicable target crop and label use. All loading of transportation and application equipment with bulk dry fertilizers shall be performed upon the herein permitted structure. The pesticide inductor and recovery tanks shall be located within the said structure.

There shall be no discharge of wastewater from the herein permitted facilities.

This permit has been reviewed and approved by the Illinois Environmental Protection Agency per the attached permit endorsement. This permit is subject to standard conditions on the reverse side of this document and the following special conditions:

SPECIAL CONDITION 1: The permittee shall provide backflow protection in accordance with the Illinois Department of Public Health Plumbing Code (77 Ill. Adm. Code 890) and the Illinois Environmental Protection Agency's Technical Policy Statement (35 Ill. Adm. Code 653.803(c)(4).

State of Illinois Department of Agriculture AGRICHEMICAL FACILITY PERMIT Wabash Valley Service Company/Page 2

DRY FERTILIZER STRUCTURES:

Operation of an existing bulk dry fertilizer storage building with the greatest dimensions measuring 72' (width) x 128' (length) with an estimated total storage capacity of 3125 tons. The structure is composed of eight (8) storage bins (two (2) storage bins, each measuring 16' (width) x 48' (length) with an estimated storage capacity of 450 tons each; two (2) storage bins, each measuring 16' (width) x 48' (length) with an estimated storage capacity of 400 tons each; three (3) storage bins, each measuring 16' (width) x 48' (length) with an estimated storage capacity of 375 tons each; and one (1) storage bin measuring 16' (width) x 48' (length) with an estimated storage capacity of 300 tons). All bulk dry fertilizer shall be stored within the herein permitted structure:

Operation of an existing reinforced concrete operational containment structure located within the aforementioned storage building measuring 12 (width) x 128 (length). The endloader transfer of bulk dry fertilizer between storage and leg shall be performed upon the herein permitted structure.

Operation of an existing reinforced concrete operational containment structure measuring 26' (width) x 72' (length). All unloading of bulk dry fertilizer shall be performed upon the herein permitted structure.

Operation of an existing reinforced concrete operational containment structure measuring 16' (width) x 39.7' (length) x 5! (depth) with a total design capacity of 360 cubic feet (ft³). The floor shall slope to a single sump measuring 1.5' (diameter) x 75' (depth) to facilitate the collection and recovery of all escaped product and/or agrichemical wastewater. All recovered effluent shall be transferred to one (1) of two (2) 550 gallon recovery tanks with a manually activated sump pump. Segregation shall be performed based upon the applicable target crop and label use. All blending of bulk dry fertilizers, including bulk dry fertilizers impregnated with pesticides, shall be performed upon the herein permitted structure.

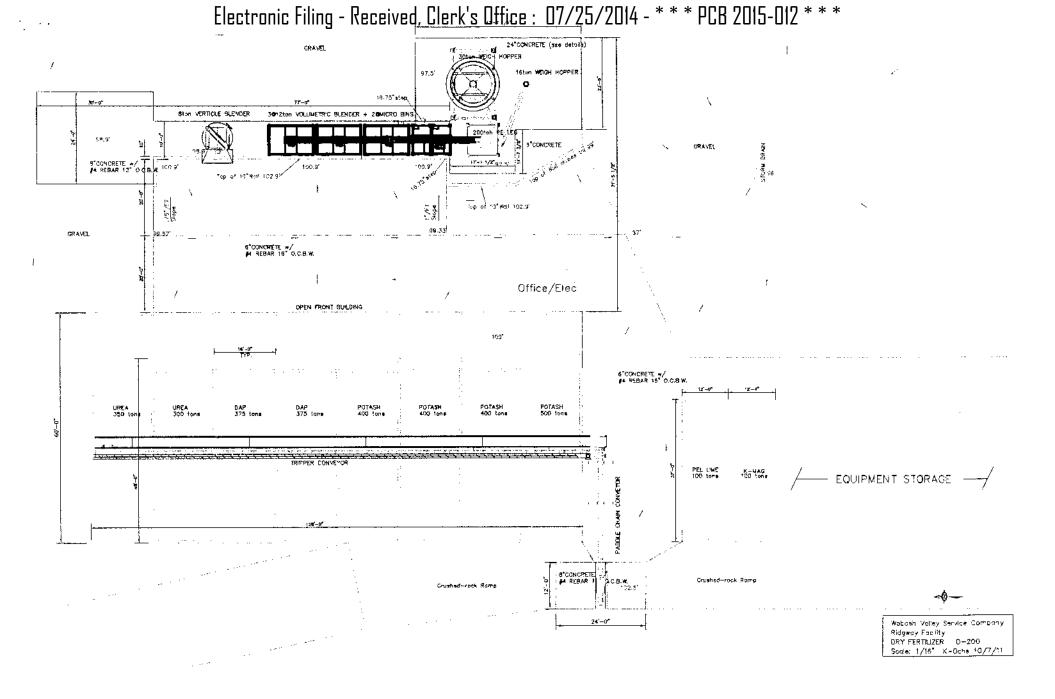

Operation of an existing reinforced concrete operational containment structure with the greatest dimensions measuring 34' (width) x 48' (length) x .6' (depth) with a total design capacity of 794 cubic feet (fr). The floor shall slope to a single sump measuring 1.5' (width) x 1.5' (length) x .75' (depth) to facilitate the collection and recovery of all escaped product and/or agrichemical wastewater. All recovered effluent shall be transferred to one (1) of the two (2) aforementioned 550 gallon recovery tanks with a manually activated sump pump. Segregation shall be performed based upon the applicable target crop and label use. All loading of bulk dry fertilizer transportation and application equipment shall be performed upon the herein permitted structure.

There shall be no discharge of wastewater from the herein permitted facilities.

This permit has been reviewed and approved by the Illinois Environmental Protection Agency per the attached permit endorsement. This permit is subject to standard conditions on the reverse side of this document and the following special conditions:

SPECIAL CONDITION 1: The permittee shall provide backflow protection in accordance with the Illinois Department of Public Health Plumbing Code (77 III. Adm. Code 890) and the Illinois Environmental Protection Agency's Technical Policy Statement (35 III. Adm. Code 653.803(c)(4).

SPECIAL CONDITION 2: The permittee shall not discharge accumulated precipitation from the herein permitted bulk liquid fertilizer secondary containment structure pursuant to the submitted Operational and Management Practices Plan.
