As ever, thanks.

You are correct on 720.111(b). All fixed now.

You are correct on 720.143(a)(4)(A)(i). Fixed now. If you guys made the correction in the proposed, I missed it. That "delta document" is often difficult to decipher. If you used track changes for that document and hard underlining and overstrike for amendments, it would be so easy, and nothing would get missed.

John T.: Please enter this e-mail exchange as a comment in R16-7. Please also replace the copy of the IIS-RA (F) in docket R16-7 with the attached version.

A couple of questions:

720.111(b), 49 CFR 171.8: I think your version is missing a space between "(2013)" and "(Definitions...".
---, 49 CFR 173.12 and 49 CFR 194: I think your version may have an extra closing parenthesis.

720.143(a)(4)(A)(i): Why is the Board reverting to ", and" rather than "; and"?
