

RRM 611.102 email from Jonathan Eastvold; our response

In 611.102(b), in the second set of USGS methods cited (Water-Resource Investigation (05-A1)), the filed pages change "Methods" to "method" rather than "methods". I am guessing that you would like the plural there (judging from what you did with 05-A5), but please advise if we should change ours to use the singular instead. **The text “method available upon request” should be “methods available upon request”. Because the notice and Code texts both incorrectly use the singular “method”, we will make note of the need to correct this in the next rulemaking.**
