

September 2nd, 2020

Ms. Barbara Flynn Currie, Chairman
Illinois Pollution Control Board
1021 N. Grand Avenue East
PO Box 19274
Springfield IL 62994

Dear Chairman Currie:

The Waukegan Chamber of Commerce is committed to shaping our business environment and making our city an exceptional place to live and work. I want to thank the board for considering some of the factors surrounding how this proposed rule would impact our community.

I understand the ash, a byproduct of burning coal to generate electricity is being stored at the Waukegan power plant site in impoundments. I encourage the board to develop an ash rule that empowers the Illinois Environmental Protection Agency with broad authority to evaluate each site on a case-by-case basis and consider many options for the closure of impoundments.

A narrow rule to close by removal wouldn't necessarily best serve Waukegan. Hauling away hundreds of truckloads of ash for many years would mean more traffic, road wear and increased public safety risks. I also believe it would be detrimental to our air quality including an increase in carbon dioxide related to truck traffic as compared other possible closure options that are equally or more effective with much less disruption to our community.

I appreciate your attention to forming a rule that doesn't arbitrarily prefer one closure method over another.

Respectfully,

A handwritten signature in black ink that reads "Jack B. Orlov". The signature is written in a cursive style.

Jack Orlov, Chairman

Board of Directors
City of Waukegan Chamber of Commerce
