John Therriault

Subject: R08-9(D): I want a protective temperature standard for the CAWS and LDPR in effect soon.

Dear John Therriault,

Thank you for accepting my comments on rulemaking 08-9(D). I live and recreate in the Chicago area and therefore am concerned with the temperature standards set for its waterways.

I support the Board's second notice rule and believe that the Board's choice to apply the general use standard for temperature makes sense. I believe rules that protect aquatic life in the Chicago Area Waterway System (CAWS) and Lower Des Plaines River (LDPR) should be just as stringent as they are for the rest of the state, and therefore would like to see the rule adopted and be put into effect without delay.

Three years for the new standards to go into effect seems like ample time and this timeframe should not be drawn out any further. I understand that entities concerned with their ability to meet the new temperature standards can seek variances if they can really show hardship but none of them have made any attempt yet to show hardship in these proceedings. They should be working on any additional monitoring and analysis they need to apply for a variance now.

The Board has a substantial record that has been built since 2008 enabling it to move forward without allowing these proceedings to drag on.

Thank you for your attention to my comments and I look forward to seeing a protective temperature standard for the CAWS and LDPR go into effect soon.

Sincerely,
Gail Curran

The quality of our waterways is urgent in order to achieve and maintain the ambience envisioned by Mayor Emanuel, as published recently on WTTW. This will be good for us citizens and good for visitors to Chicago. There is simply no reason to equivocate.

Thank you for your attention to my comments and I look forward to seeing a protective temperature standard for the CAWS and LDPR go into effect soon.

They should be working on any additional monitoring and analysis they need to apply for a variance now.

The Board has a substantial record that has been built since 2008 enabling it to move forward without allowing these proceedings to drag on.

Thank you for your attention to my comments and I look forward to seeing a protective temperature standard for the CAWS and LDPR go into effect soon.

Sincerely,
Kathryn Bainbridge

Subject: R08-9(D): I want a protective temperature standard for the CAWS and LDPR in effect soon.

Dear John Therriault,

Thank you for accepting my comments on rulemaking 08-9(D). I live and recreate in the Chicago area and therefore am concerned with the temperature standards set for its waterways.

I support the Board's second notice rule and believe that the Board's choice to apply the general use standard for temperature makes sense. I believe rules that protect aquatic life in the Chicago Area Waterway System (CAWS) and Lower Des Plaines River (LDPR) should be just as stringent as they are for the rest of the state, and therefore would like to see the rule adopted and be put into effect without delay.

Three years for the new standards to go into effect seems like ample time and this timeframe should not be drawn out any further. I understand that entities concerned with their ability to meet the new temperature standards can seek variances if they can really show hardship but none of them have made any attempt yet to show hardship in these proceedings. They should be working on any additional monitoring and analysis they need to apply for a variance now.

The Board has a substantial record that has been built since 2008 enabling it to move forward without allowing these proceedings to drag on.

Thank you for your attention to my comments and I look forward to seeing a protective temperature standard for the CAWS and LDPR go into effect soon.

Sincerely,
Philip Kritzman
