Illinois Pollution Control Board

Dear Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

I understand from Environment Illinois Campaign Director Lisa Nikodem that corporate agribusinesses are pushing back hard against even these small steps. Left unchecked, these kinds of practices become someone else's problem and someone else's expense. You know I noticed my neighbor this morning kicking out into the street a piece of garbage from his garbage can that was missed by the garbage collector. It might have been carelessness on the part of the collector, but my neighbor was willing to make it someone else's problem, rather than pick it up and take it back into the house for next week's collection. The problem originates with the agribusinesses and needs to be dealt with by the agribusinesses. Not some innocent downstream, or in the case of my neighbor, downwind. Thank you for standing up for Illinois's rivers and streams.

Sincerely,

Jane Jahimiak
6207 Park Ave

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Not only will this legislation help protect public waterways, but also it will improve our economy by accounting for full costs of products like factory farm meat. Our system will function better if factory farms are properly held accountable.

Thank you.

Thank you for standing up for Illinois's rivers and streams.

These factory farms have to be stopped, not only because of the pollution they cause, but also because of the treatment of the animals. They are cruel and disgusting and the meat is harmful as well.

Why do we have so many of these farms? I would like an answer. We don't want or need this in Illinois.

Sincerely,

Marjorie Fritz Birch

Illinois Pollution Control Board

Dear Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,

Germaine Caprio

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

I have witnessed the slow but dangerous impact factory farms make to surrounding waters and lands in Wisconsin, where my family owned land while I was growing up. Impact seems small at first but escalates and accumulates over time.

Thank you,

Sincerely,

Catherine Taylor
