Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,
Karen Stacey

Raising cattle, especially on factory farms, is one of the greatest, if not THE greatest cause of climate change for many reasons. In addition, pollution to our rivers and streams is a direct threat to our health.

Thank you for standing up for Illinois' rivers and streams

Sincerely,
Barbara Steigman

Thank you for standing up for Illinois's rivers and streams. Not only are CAFO's poisoning fresh water supplies, but the animals who are subjected to these systems are forced into intolerable conditions, that endanger not only THEIR health, but the health of consumers,, esp disturbing are the huge amounts of antibiotics that , injected into these animals, contribute to weakening effects of these meds in our human population.

The system needs controls imposed by law!

Sincerely,
Mary Lee Orr

Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,
Ann McMahon

- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

I did a research paper on the subject a few years ago, and it really is quite scary the harm factory farms can cause. And I'm not even talking about animal welfare, which is another concern in and of itself. No, I'm just talking about what factory farms do to us.

The huge amounts of fecal matter that ends up in rivers and lakes can devastate local fishing industries. And the pollution can also make the area around the factory farm such a toxic place to live that people become desperate to move away from the area, thus harming real estate industries as well. Furthermore, because factory farms pack so many animals in such tight conditions, if a few become contaminated with a disease, it spreads like wildfire and ends up flooding the supermarkets, threatening to make people seriously ill. Just pumping the livestock full of antibiotics to prevent sickness doesn't work because that encourages bacteria to evolve, thus creating supergerms that are even harder to deal with.

But you probably knew all that already. You undoubtedly get tons of letters like this, so if you have read this far, thank you for your time, and I sincerely hope you will continue to work to make our state a better place.

Sincerely,
Sarah Matthews
