Illinois Pollution Control Board

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams. In addition to the obvious yuck factor of all the manure going into our water, I am extremely concerned about all of the hormones and antibiotics that are fed to and pumped into these animals throughout their lives, and are also inevitably ending up in our water supply. It's bad enough that people are being subjected to eating the tainted meat that comes from these animals - at least I have a choice about that. I can't opt out of the water supply, unfortunately. Please do not cave to the demands of corporations who knowingly and unapologetically poison us in the name of profit.

Sincerely,
Erin O'Brien

Thank you for standing up for Illinois's rivers and streams. With precious water supplies threatened by drought, fracking, agricultural run-off, and so much more, it's now or never to make water protection a top priority. Water is not a renewable resource. Only 1% of the world's water is drinkable. If we poison that in our stupidity, we'll get no more. So let's make this year and every year a year of safeguarding our water.

Sincerely,
Margaret Nagel

Thank you for standing up for Illinois's rivers and streams. I fought with the H.O.M.E.S group against the Bos dairy in Nora Illinois for nearly four years. It took the holding ponds turning purple from contamination to convince people the threat to water is real. We know you a fighter for clean water, (look at West Virginia). We as a people cannot allow factory farms in Illinois. They must be stopped at all costs.

Sincerely,
Thomas Bergstrom

Subject: R2012-023

Dear Illinois Pollution Control Board,

I am writing in support of the Illinois Pollution Control Board's proposed rule on factory farms.

Pollution from factory farms, like animal waste and chemicals, threatens the rivers and streams we love and depend on. That's why I fully support the IPCB's proposal to:

- Ban manure spreading practices that threaten our rivers, streams, or drinking water
- Ensure the public's right to know about every factory farm operation across the state, so we know where the pollution is coming from.

Much tougher action will be needed to truly curb factory farm pollution. But these are good first steps, and I hope that you will fully support them.

Thank you for standing up for Illinois's rivers and streams.

Sincerely,
Judith Davy
