Amending PCB 2020-010 to add neighbors whose homes are in closer proximity to the noise generating dust collector:

Heather Walsh

heatherwalsh1728@comcast.net - email

Homeowner at

130 Woodland Ave

Winnetka, IL 60093

(Located 45 feet north of 124 Woodland Ave - closer to the noise generating equipment)

Cris Downey

yenwod@yahoo.com - email

847-894-9911 - cell

Homeowner at

138 Woodland Ave

Winnetka, IL 60093

(Located directly across the street from the noise generating equipment-north from 124 Woodland Ave)

The above mentioned neighbors are affected by the noise to a higher degree due to the fact that their homes are in closer proximity to the noise generating equipment.

All neighbors ask that the noise generated by the New Trier High School is measured and confirmed by the district to be below the allowable limits as reported/outlined in the original complaint.

Furthermore, all neighbors have collectively agreed that in addition to addressing the dust collector noise the New Trier High School administration also needs to address the following:

- Highly-impulsive sounds caused by garbage trucks picking up and dropping trash compactors on to the floor of the service dock
- Roof top units to include kitchen exhaust fan that run at night and have never been tested against the night time noise limit
- Ground level basement fans
- Electrical cabinets/transformer noise along Woodland Ave
- Newly added roof top green house and its ventilation fans

All of which should be tested by the district as part of comprehensive noise survey to ensure compliance with Environmental Protection Pollution Control Board Sound Emission Standards and Limitations
